DIRECTIONS FOR USE:

Alleviates the annoyance from mosquitoes by repelling and killing mosquitoes and reducing the number of bites in an area up to 4.5 metres from the product (as large as an average-size deck or patio) for up to four hours. Effect is **not** immediate. For best results, allow 30 minutes for product to take effect. This product works well in outdoor areas where there is minimal air movement, such as decks, porches, patios, yards and campsites. Use one lantern per each 21.0 square metres (an area 4.5 x 4.5 metres or 15' x 15'). Use more lanterns in larger areas, spacing them to ensure adequate coverage. Wind, heat or humidity may affect the performance of this product. Lantern and mat effectiveness may be diminished if exposed to rain. No messy wax to drip or spill. Lantern provides light and repels and kills mosquitoes. Batteries power the light; heat from the Thermacell cartridge activates the repellent mat and provides mosquito repellency for an area the size of an average deck or campsite for up to 4 hrs per mat.

To Use the Light:

1. Open the battery compartment and insert 3 AAA batteries. Ensure the batteries are properly aligned with the +/- signs. Close the battery compartment.
2. To use the light, slide the ON/OFF switch to the ON position. To turn the light off slide the ON/OFF switch to the OFF position.
3. The light may be used with the mosquito repellent or independently.

To Use the Mosquito Repellent:

1. Remove one Thermacell mat from wrapper. Mats last a maximum of 4 hours. Mat turns from pale blue to white when repellent has been exhausted. Insert the mat under the grill at the top of the lantern.
2. Remove butane cartridge cap and screw cartridge into lantern. Turn cartridge clockwise until it stops. Make sure the cartridge is fully inserted.
3. To activate the mosquito repellent, grasp the lantern collar and rotate collar to the right until the indicator line points to "ON". The gas will begin to flow.
4. Wait approximately 5 to 10 seconds then rotate lantern collar further to the right until the indicator line points to "START". You should hear a clicking noise.
5. To verify that the mosquito repellent is activated look at the circular view hole located on the lantern collar to the right of the "START" button. An orange light will glow. If there is no orange light, rotate indicator line back to the "ON" position and repeat rotation to the "START" position two to three times in rapid succession.
6. If there is still no orange light visible in the view hole, make sure the cartridge is completely screwed into place. Also check the amount of fuel in the cartridge. If cartridge is empty or near empty, remove cartridge and replace with a new cartridge. Then repeat steps 3-5.
7. When finished using the lantern, rotate the lantern collar to the left until the indicator line is in the "OFF" position. Allow lantern to cool completely before storing.
8. To replace a used mat, make sure indicator line is in the "OFF" position and allow lantern grill to cool. Push the used mat out by inserting a fresh mat.

Troubleshooting: If lantern does not turn on, verify that there is no orange glow in the view hole. If there is no orange glow, rotate indicator line back to the "ON" position and repeat rotation to the "START" position two to three times in rapid succession. If there is still no orange glow visible in the view hole, make sure the cartridge is completely screwed into place. Also check the amount of fuel in the cartridge. If cartridge is empty or near empty, remove cartridge and replace with a new cartridge. Then repeat step #3.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN AND PETS. Harmful if inhaled. Avoid breathing vapours. For outdoor use only to kill and repel mosquitoes. Do not use indoors, in tents or any enclosed area. Do not touch the grill while the lantern is in use. The grill is hot while in use. Do not insert anything other than Thermacell® mats into the lantern. Place lantern on a flat, stable surface with the grill facing upward. Do not cover with any material while in use. Clean with a damp cloth only when the lantern is cool and inactive. Store unused mats in the original packaging in a cool, dry place inaccessible to children and pets. Store lantern and butane cartridges in a cool, dry place away from sources of heat. Harmful or fatal if swallowed. May be harmful if absorbed through skin. Avoid contact with skin and clothing. Wash hands with soap and water after use. Cover exposed food.

Cartridge contains flammable butane. Do not use near sparks or open flames. Do not insert anything other than the mats in the grill. Do not allow mat to come into contact with other substances. Cartridges contain pressurized butane. Protect the butane cartridges from sunlight. Do not expose them to temperatures above 50°C (120°F). Do not pierce, break or incinerate butane cartridges, even after

use. Butane cartridges other than Thermacell® cartridges will not work in this lantern. Seller will not be held responsible for damage, injury or poor performance caused by use of other butane cartridges or repellent mats.

ENVIRONMENTAL PRECAUTIONS

Toxic to aquatic organisms.

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by disposal of wastes.

FIRST AID:

If swallowed: call a poison control centre or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

If Inhaled move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If on skin or clothing take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice.

If in eyes hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION:

Treat symptomatically.

STORAGE:

To prevent contamination, store this product away from food or feed.

DISPOSAL:

DO NOT reuse empty packaging. Wrap the used mats and butane cartridges and dispose in household trash. DO NOT incinerate butane cartridges. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites. Damaged cartridges are to be returned to the distributor or manufacturer.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the Pest Control Products Act to use this product in a way that is inconsistent with the directions on the label.

- 92. An insect repellent as tough as you [are]

Area of Protection

- 93. Use [more] [#] [multiple] [lanterns] [to cover] [protect] your whole yard [larger area] [campsite]

94. Protect your entire yard with Thermacell
95. Each [lantern] [appliance] [unit] provides up to 21.0 square metres (an area 4.5 x 4.5 metres or 15' x 15') feet of protection
96. Use [#] lanterns [[products] [units]] to protect a larger [greater] area
97. Use [#] lanterns to protect a [#]m x [#]m area
98. Protect your whole backyard with Thermacell products [torches] [lanterns] [appliances] [units]

How it Works

99. Heat-activated repellent mat repels mosquitoes
- 100.Heating [Heated] [the] [repellent] mat releases repellent into the air and provides repellency from mosquitoes
- 101.Repellent mat releases repellent when heated by the Thermacell® [power] cartridge
- 102.Thermacell® cartridge heats the repellent mat; repellent is released creating an [area] of repellency
- 103.Heat activated repellent for better mosquito protection
- 104.Heat activated repellent for effective mosquito protection covering up to 21.0 square metres (an area 4.5 x 4.5 metres or 15' x 15')
- 105.Heated activated mat releases repellent into the air.
- 106.[X] Repellent Mats - release repellent when heated for up to 4 hours per mat
- 107.Thermacell® [power] [Butane] Cartridge – [heats repellent mat and] lasts a maximum of 12 hours.
- 108.Batteries power the light; heat from the Thermacell cartridge activates the repellent mat and provides mosquito repellency for an area the size of an average deck or campsite.

Where to Use

- 109.Ideal [great] for decks, patios, and backyards [outdoor entertaining, parties, and around pools [poolside] and patios]
- 110.[Thermacell® products can be used] For [use in] backyard[s], barbecues*, [outdoor] camping, [outdoor] campsites, decks, docks, gardening, hunting, [other] social events [gatherings], outdoor dining* [entertaining*], parties, patios, picnics*, spectator sports, at spectator sports, beaches, around pools, pools, poolside, parks and yards -- *Cover or remove all exposed food.
- 111.Great for campgrounds
- 112.Protect your deck [or] [patio] [or] [backyard] from uninvited guests
- 113.Ideal for decks, patios, backyards, camp(site)(ground), dock, & pier

Placement

114. To clear mosquitoes from under table, place underneath (table) for a few minutes. [Keep level.]
115. Place product upwind for maximum repellency.
116. Windy conditions can reduce [product name] effectiveness
