**Clorox™ Pool&Spa™ My Salt Pool™ All-Purpose Algaecide** is effective at killing and controlling algae in swimming pool water. It is especially recommended for green, blue-green and mustard- coloured algae growths.

**DIRECTIONS FOR USE:**

**To treat visible algae growths:** Vacuum leaves and any other foreign debris from pool. Brush visible algae from surface with surface compatible brush. If necessary, adjust pool water pH to 7.4 - 7.6 range. Add **Clorox™ Pool&Spa™** chlorinating product, as per label directions, to oxidize water soluble organic wastes. Allow to circulate for 1 hour. Then apply 100 mL of **Clorox™ Pool&Spa™ My Salt Pool™ All-Purpose Algaecide** per 10,000 L of pool water. Dilute the concentrate into 4 or more litres of water and apply in areas of greatest circulation. Continuously circulate pool water for 24 hours. Do not use pool until sanitizer level drops below 3 ppm. In extreme cases if algae persists, repeat **Clorox™ Pool&Spa™ My Salt Pool™ All-Purpose Algaecide** application after 2-4 days.

**To prevent algae if no visible algae is present:** Initially apply 50 mL of **Clorox™ Pool&Spa™ My Salt Pool™ All-Purpose Algaecide** per 10,000 L of pool water by diluting the concentrate in 4 or more litres of water and applying to pool water in areas of greatest circulation. Every week thereafter, apply 10 mL per 10,000 L of pool water to maintain proper preventative levels.

**DO NOT** contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

**PRECAUTIONS:** KEEP OUT OF REACH OF CHILDREN. Highly corrosive. Harmful if swallowed. Causes severe eye and skin damage. May be fatal if swallowed. Do not mix with any other chemical. Avoid contact with skin and eyes. Wear protective safety glasses and rubber gloves when handling this product. Irritating to nose and throat. This product is toxic to fish. Do not dispose effluent into lakes, rivers, ponds or public waters. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

**FIRST AID:**

**If in eyes,** hold eye open and rinse slowly and gently with water for 15 -20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

**If on skin or clothing,** take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

**If swallowed,** call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

**If inhaled,** move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison

control centre or doctor for further treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** Treat symptomatically.

**DISPOSAL:** Rinse container thoroughly before discarding. Do not reuse empty container.

Offer for recycling if available, or dispose in accordance with local and provincial regulations.

For information on disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.

**ENVIRONMENTAL HAZARDS:** TOXIC to aquatic organisms.

**NOTE:** Metals from source water or ionizers have the potential to stain pool surfaces. Staining of pool surfaces may occur due to deposits of copper salts. Excessive levels of copper will increase the probability of this occurrence. Treat these problems with an appropriate stain and scale inhibitor (chelating agent) before using this product. Copper levels in the swimming pool water should not exceed 1 ppm. If a copper level of 1 ppm is reached, apply **Clorox™ Pool&Spa™ My Salt Pool™ All-Purpose Algicide** only if needed to maintain the copper level between 0.5-1.0 ppm.

**IN CASE OF MEDICAL EMERGENCY, CALL 1-877-800-5553.**
