TCCA BORATE ZINC SPA  
STABILIZED CHLORINATING PUCKS  
DESTROYS BACTERIA AND ALGAE in spa water

DOMESTIC

REG. NO. 32983 P.C.P. ACT

ACTIVE INGREDIENT:

AVAILABLE CHLORINE present as Trichloro-s-triazinetrione..... 86.4%  
Zinc present as Zinc oxide .....0.4%

DANGER

POISON      CORROSIVE TO EYES

SKIN IRRITANT

xx g per puck

NET CONTENTS

READ THE LABEL BEFORE USING

KEEP OUT OF REACH OF CHILDREN

Sani-Marc Inc,  
42 rue de l'Artisan  
Victoriaville, Quebec, Canada  
G6P 7E3  
1 866 470-7264

## **DIRECTIONS FOR USE**

Weight per puck: 15 to 600 g

### **WARNING:**

Direct puck contact may cause bleaching of spa surfaces. Automatic feeding devices employing these pucks must be totally free from traces of other sanitizers to avoid the possibility of an explosion.

1. Maintain recommended daily levels as determined by testing kit.

Free available chlorine: 3.0 – 5.0 ppm

pH: 7.2 – 7.8

Total alkalinity: 100-120 ppm

Calcium hardness: 150 – 200 ppm

2. Superchlorinate freshly filled spa by adding 20 g of TCCA Borate Zinc Spa per 1,000 L of spa water. Maintain water circulation at least 1 hour before using. (Always ensure free available chlorine is within the recommended levels before using the spa). Repeat superchlorination procedure after each use period.

3. If using an automatic chlorinator, fill the chamber with TCCA Borate Zinc Spa pucks and adjust flow rate according to manufacturer's recommendations to maintain proper chlorine residual.

Adding pucks to the skimmer basket is an alternative chlorine feed method.

4. Chlorinate daily to maintain proper chlorine residual with 10 g of TCCA Borate Zinc Spa per 1,000 L of spa water, or as needed.

5. Persistent foam formation, turbid, or malodorous water are indicators of inadequate sanitizer levels. To correct such conditions, superchlorinate spa water by adding 30 g of TCCA Borate Zinc Spa per 1,000 L of spa water. Maintain water circulation at least 1 hour and wait 4 hours before using. (Always ensure free available chlorine is at the recommended levels before using the spa).

6. Note for superchlorination: TCCA Borate Zinc Spa contains a cyanuric acid stabilizer which can accumulate in spa water. Superchlorinating with TCCA Borate Zinc Spa will increase the stabilizer level more rapidly. Keep stabilizer level within the range of 30-100 ppm by diluting with fresh water. Superchlorinating with TCCA Borate Zinc Spa will also lower total alkalinity. Ensure total alkalinity remains within the recommended levels.

7. NOTE: Maximum spa water usage temperature is 40°C. Duration in spa water at 40°C should not exceed 15 minutes. For proper sanitation, spa must be completely drained periodically. The number of days between COMPLETE SPA DRAINAGE is equal to the volume of spa water in litres, divided by 10 times the maximum number of daily spa users. Refill spa with water and repeat DIRECTIONS FOR USE.

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

## **PRECAUTIONS**

KEEP OUT OF REACH OF CHILDREN. Strong oxidizing agent. May cause fire or explosion if contaminated. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. It is recommended to wear rubber gloves when handling this product. Corrosive to eyes. Severely irritating to skin. DO NOT get in eyes, on skin or on clothing. Harmful or fatal if swallowed. This product is irritating to the respiratory tract. Harmful or fatal if inhaled. Avoid inhaling dust and fumes generated by this product.

## **STORAGE**

Keep container closed and store in a cool, dry location. To prevent contamination store this product away from food or feed.

## **DISPOSAL**

DO NOT reuse the empty containers. Dispose in household garbage. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.

#### **FIRST AID**

**IF ON EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control centre or doctor for treatment advice. **IF SWALLOWED:** Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. **IF INHALED:** Move person to fresh air. If the person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control centre or doctor for treatment advice. Take container, label or product name and Registration Number with you when seeking medical attention.

#### **TOXICOLOGICAL INFORMATION**

Probable mucosal damage may contraindicate the use of gastric lavage. Treat symptomatically.

##### **EASY 3-IN-1**

- Sanitizes and clarifies spa water
- Eliminates algae and helps prevent future growth
- Eliminates algae in spa water
- Provides crystal clear water by destroying bacteria and algae in spa water
- Spa algacide and bactericide
  
- Helps protect against algae growth
- Protects chlorine from the sun to extend its effective lifespan
- Prevents green water
- Kills bacteria in spa water
- Triple action tablets
- Triple action tablets for routine spa care
- Worry-free sanitizer-clarifier
- Reduces the amount of chlorine needed by preventing organic growth
- Leaves no residue
- Softens water
- Safe for all spa surfaces
- Safe for use in skimmers
- Easy to use
- Great alternative to calcium-based sanitizers
- Great alternative to liquid sanitizers
- Prevents the appearance of black, yellow or mustard algae
- Prevents the appearance of black algae
- Prevents the appearance of yellow algae
- Prevents the appearance of mustard algae
- Slow dissolving tablets
- Slow dissolving formula makes maintaining chlorine levels easy
- Will not stain spa equipment
- Better regulates the release of chlorine
- Steady release of chlorine

Improves the efficiency of chlorine  
Makes controlling stabilizer level easier  
Ideal for well water-fed spas  
Compatible with cartridge filters  
Improves the efficiency of the filtration system  
Quickly resolves cloudy water in spas  
Reduces the turbidity of water  
Ideal for use with well water  
Ensures sparkling clear water  
Clarifying action  
Makes spa water softer to the touch  
Makes water feel silky smooth  
For softer water  
Spa water softener  
Gives to spa water softer sensation
