**KONK HORNET & WASP JET SPRAY II
PRESSURIZED CONTACT & RESIDUAL CRACK, CREVICE INSECTICIDE SPRAY
FOAM**

For Indoor Use to Control Spiders, Sowbugs, Earwigs, Cockroaches, Crickets, Millipedes, Silverfish, Ants, Fleas, Carpet beetles, Brown Dog Ticks.

For Outdoor Use on ant hills around buildings to Control Ants

For Outdoor use to Control Wasps, Yellow Jackets and Hornets In Their Nests.

DOMESTIC ACTIVE INGREDIENT:

Pyrethrins 0.050 %

N-octyl bicycloheptene dicarboximide 0.250 %

Permethrin 0.200 %

REG. NO. 32618 P.C.P. ACT

NET CONTENTS 100-600 g

**CAUTION
EXPLOSIVE**

KEEP OUT OF REACH OF CHILDREN

READ THE LABEL BEFORE USING

Acuity Holdings Inc 11627 – 178

DIRECTIONS FOR USE:

SHAKE WELL BEFORE USE. [Remove protective cap and insert [applicator wand/extension tube/wand/applicator] into spray nozzle before using.] [Wait approx. 30 seconds [before spraying] [to allow formula to [settle][/][equilibrate]] [& for optimal stream].

For use indoors as a crack and crevice treatment to control ants, spiders, sowbugs, earwigs, cockroaches, crickets, millipedes, silverfish, fleas, carpet beetles and brown dog ticks. KONK HORNET & WASP JET SPRAY II can also be used outdoors to control ants in cracks and crevices and outdoors to control wasps, yellow jackets and hornets in their nests.

Within the specified use location, to enhance effectiveness of this product, apply directly to the listed pests where possible. When applied indoors, good sanitary practices should be maintained to prevent re-infestation.

The application of this product to vinyl and aluminum siding (particularly lightly colored, aged, weathered or otherwise damaged) may result in staining, bleaching or discoloration. Factors such as extreme heat and direct sunlight can promote damage. Always pre-test a small inconspicuous area to be treated for colour fastness and staining. Evaluate 30 minutes after test application for potential staining. Regardless of the test results, **DO NOT** apply to vinyl or aluminum siding while exposed to direct sunlight or during the heat of the day. (**DO NOT** apply to tapestries, wall paper or similar materials that may be stained).

FOR INDOOR USE AT BUILDINGS:

How to Apply

DO NOT APPLY AS A SPACE SPRAY, PERIMETER OR BROADCAST TREATMENT.

Apply as an indoor crack and crevice treatment only. Crack and crevice is an application directly into narrow openings on the surface of the structure. It does not include the treatment of exposed surfaces. Narrow openings typically occur at expansion joints, utility entry points and along baseboards and mouldings.

To Control Ants, Carpet Beetles, Cockroaches, Crickets, Earwigs, Millipedes, Sowbugs, Spiders and Silverfish:

Thoroughly treat indoor building surfaces in hard to reach areas including, cracks, crevices in walls, floors and ceilings; along and behind baseboards; around water pipes and tanks; walls behind and floors beneath appliances (e.g., refrigerators and stoves) and furniture (drawers, cabinets and storage units); around sinks, drains and pipes, around interior foundations; garbage containers; localized areas of floors and floor coverings; and points of entry (e.g., around windows and doors). **DO NOT** exceed 9 seconds per m². Treatment must only be repeated after 7 days if pest problem persists or reoccurs.

To Control Fleas and Brown Dog Ticks:

DO NOT apply to pet bedding, furniture, mattresses, linens, toys or clothing. **DO NOT SPRAY PETS WITH THIS PRODUCT.** Only treat pets with products specifically registered for use on that type of pet. Apply to indoor building surfaces, including cracks and crevices in walls and floors, along and behind baseboards, window and door frames, and localized areas of floor and

2023-3455

2023-12-21

floor coverings. For effective flea and tick control indoors, clean any area used by the pet. Cleaning the areas includes vacuuming floors, carpets, furniture, etc. (discard vacuum bag after use) and washing the pet's bedding, living quarters, and surrounding area. **DO NOT** exceed 9 seconds per m². Treatment must only be repeated after 7 days if pest problem persists or reoccurs.

Outdoor Use:

FOR OUTDOOR USE ON ANT HILLS:

For the control of ants, gently insert the (wand or applicator wand or extension tube) as far as possible into cracks and crevices in driveways, patios, sidewalks, or interlocking brick where ants hide. (Pull or Push or Depress) (trigger or nozzle) and allow foam to fill the area. Stop spraying when the foam comes back out the crack or crevice. For best results, treat all cracks and crevices in the area where ants are found. **DO NOT** exceed 9 seconds per m². Treatment must only be repeated after 7 days if pest problem persists or reoccurs.

TO CONTROL WASPS, HORNETS & YELLOW JACKETS IN THEIR NESTS.

The best time to apply the product to nests is in late evening or early morning, during cooler temperatures, and when most insects are at rest inside the nest. Observe for little activity around the nest opening. **DO NOT** stand directly under the nest. Treated insects may fall out of the nest and die. Apply only if there is little to no wind or breeze. From a distance of 2 to 2.5 m, with any light wind or breeze coming from behind, point actuator button with or without the applicator in the direction of the insect nest. Depress trigger, and continue spraying until the opening of the nest is completely covered with the insecticide foam. Because the insects will now be unable to leave the nest, insert the applicator into the nest opening and fill the nest space (or void where nest is located) with the insecticide foam. Wait at least 48 hours or until no signs of activity before removing the nest. **DO NOT** exceed 9 seconds per m². Treatment must only be repeated after 7 days if pest problem persists or reoccurs.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. May be harmful if swallowed, inhaled or absorbed through skin. Avoid contact with skin, eyes and clothing. Avoid breathing spray mist. Wash thoroughly with soap and warm water after using. Cover fish bowls when spraying. **Do not** contaminate animal feeding areas. Contents under pressure. Do not place in hot water or near radiators, stoves or other sources of heat. **Do not** store or use above 50°C as container may burst. **DO NOT** puncture or incinerate container or spray near open flame or spark, or while smoking.

Use Limitations for All Uses:

- **DO NOT** apply to any body of water.
- **DO NOT** contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.
- Avoid application of this product when winds are gusty.
- **DO NOT** apply to surfaces that may come into contact with food/feed. Cover or remove all food/feed. Cover all food/feed processing surfaces, equipment and utensils or thoroughly wash following treatment. Any food/feed accidentally contaminated with spray solution must be discarded.
- **DO NOT** apply when people or pets are present.
- **DO NOT** allow people or pets to enter treated areas until sprays have dried.
- **DO NOT** allow spray to drip or allow drift onto non-target surfaces.

2023-3455

2023-12-21

- DO NOT apply to people, pets, livestock or sources of electricity.
- DO NOT apply to mattresses, linens, toys, or clothing.
- DO NOT apply to overhead areas or in confined spaces (for example, indoors in attics, crawlspaces, small storage rooms, closets and outdoors in eaves, soffits (except when using to control wasps/hornets/yellow jackets in their nests)).
- When applied indoors, ventilate treated areas after application by opening windows and doors or using fans where required to aid in the circulation of air.
- When applied outdoors: DO NOT apply in areas where plants are grown for food or feed (e.g., vegetables, fruit, herbs). Avoid spraying vegetation and non-target structural surfaces. Hose off any plants or non-target structural surfaces that are contacted with foam with water.
- When applied outdoors to the exterior surfaces of buildings and on listed structures: **DO NOT** treat soil, turf or other plants adjacent to the treatment site.

FIRST AID: IF ON SKIN OR CLOTHING, Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **IF IN EYES**, Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **IF SWALLOWED**, Call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give any liquid to the person. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

ENVIRONMENTAL PRECAUTIONS: Toxic to aquatic organisms. Toxic to bees. Avoid application around blooming plants. If applications must be made during the blooming period, restrict applications to evening when most bees are not foraging. For the treatment of stinging insect nests, this product is intended for use on yellow jackets, hornets and wasps only. Toxic to beneficial arthropods (which may include predatory and parasitic insects, spiders, and mites). Minimize exposure to non-target areas.

TOXICOLOGICAL INFORMATION: Skin exposure may cause transient sensations (tingling, burning, itching, numbness). Other symptoms of exposure could include respiratory effects (such as cough, respiratory irritation, or shortness of breath), nausea, headache or dizziness. This product contains petroleum distillates. Vomiting may cause aspiration pneumonia. Treat symptomatically.

STORAGE:

Store this product away from food or feed.

DISPOSAL: When container is empty, press button to release all pressure. **DO NOT** puncture or incinerate. **DO NOT** reuse the empty containers. Dispose in household garbage. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.
