

DUO

SANITIZER ALGAECIDE

SANITIZES AND CLARIFIES Pool Water

DOMESTIC TABLET (PUCK)

REG. NO. 33062 P.C.P. ACT

ACTIVE INGREDIENT:

AVAILABLE CHLORINE (present as trichloro-s-triazinetrione).....88.65%
COPPER (present as copper sulfate pentahydrate).....0.38%

Strong oxidant. Contamination or improper use may cause fire, explosion or the release of toxic gases. Add product only into water. DO NOT use in feeders, floaters, skimmers or any other dispensers that have been used with any other product.

WARNING: Staining of pool surfaces may occur due to deposits of copper salts. Excessive levels of copper will increase the probability of this occurrence.

Toronto (Ontario) M4P 2V8
1-877-8CT-POOL

Weight per tablet: 200 g

DUO contains slow-dissolving stabilized chlorine and a protective agent reducing chlorine loss due to UV rays. DUO's dual action formula provides continuous chlorination and effective, long-lasting protection against bacteria and algae growth in pool water. Regular use of DUO will keep water crystal clear while providing effective and long-lasting protection against green water problems. DUO eliminates organic matter in pool water such as sunscreen, shampoo, leaves, etc. DUO's 2-in-1 stabilized chlorine and algaecide formula takes up less storage space and makes pool maintenance easier.

For clear pool water, follow our 3-step pool maintenance program:

Step 1: Balancing

Step 2: Sanitizing

Step 3: Weekly shock treatment

DIRECTIONS FOR USE:

Use in a floating dispenser, automatic chlorinator or feeder designed for this product or place in skimmer. Do not place directly in pool. This may cause bleaching of vinyl or painted pool surfaces.

Maintain values at the appropriate levels daily; these levels can be determined using a test kit.

Free available chlorine:	1.0 - 3.0 ppm
pH:	7.2 - 7.8
Total alkalinity:	100 - 120 ppm
Calcium hardness:	200 - 300 ppm

It is strongly recommended to make any necessary adjustments promptly with the appropriate Aquarius Brand pool care products.

If using an automatic chlorinator, fill the receptacle(s) with DUO tablets and adjust the flow rate according to the manufacturer's recommendations to maintain daily residual chlorine levels at the desired values. Alternatively, tablets can be added to the skimmer basket. Maintain proper daily chlorine residual by adding 50 grams per 10,000 L of pool water, as often as needed.

NOTE: In hot weather, after heavy use or rain, higher doses may be needed to keep residual chlorine levels at the appropriate levels.

Regular superchlorination of the pool water is recommended. Follow the label instructions of the Aquarius Brand superchlorination product used.

DUO contains a cyanuric acid stabilizer which can accumulate in pool water. Stabilizer levels should be checked periodically with a test kit. Keep the stabilizer level within the recommended 30-100 ppm range by diluting the pool water with fresh water when necessary. Make any necessary adjustments promptly with the appropriate Aquarius Brand pool care products.

OPENING YOUR POOL:

Balance pool water, shock treat, and add Aquarius Brand **Chlorinator and Algaecide** in accordance with label directions to provide 0.25 ppm copper to the pool water. Do not enter the pool until the chlorine residual is 1 to 3 ppm as measured with a reliable test kit or test strips.

SHOCK TREATMENT:

Perform a weekly shock treatment with an Aquarius Brand shock product to kill bacteria and organic contaminants and to keep water clear. Follow the label instructions on the shock treatment product. Immediately after the shock treatment, thoroughly clean the pool surfaces by brushing and running the water through the filter.

Do not enter the pool until the chlorine residual is 1 to 3 ppm as confirmed by a reliable test kit or test strips.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. DO NOT apply this product so that it comes into direct contact with children or pets. Harmful or fatal if swallowed. This product is irritating to the respiratory tract. May be fatal if inhaled. Avoid breathing dust and fumes. Corrosive to eyes. Causes skin irritation. DO NOT get in eyes, on skin or on clothing. Do not handle with bare hands. Wearing rubber gloves when handling this product is recommended. Wash hands before eating, drinking, chewing gum, smoking or using the toilet. Remove and wash contaminated clothing before reuse. Strong oxidizing agent. Dangerous gas formed when mixed with acid. DO NOT use in feeders, floaters, skimmers or any other dispensers that have been used with any other product. Do not mix with any other chemical. Do not allow product to contact any foreign matter, including other pool/spa treatment products. Do not let product get wet or damp before use. Do not add water to this product. Add product only into water. Do not mix in a small amount of water. If product is exposed to small amounts of water, it can react violently and generate heat and toxic gases and splatter. Contamination or improper use may cause fire, explosion or the release of toxic gases. Keep away from heat and from flame and burning material (like a lighted cigarette).

FIRST AID:

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If the person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control centre or doctor for treatment advice.

IF ON EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, the label or product name and registration number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. Treat symptomatically.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

STORAGE: Keep product dry and in its tightly closed container when not in use. Store container in a cool, dry and well-ventilated place. Keep container away from heat and open flame. Do not contaminate food for human or animal consumption by the improper disposal, storage or cleaning of equipment.

DISPOSAL: Rinse container thoroughly before discarding. Do not reuse empty container. Use a recycling service, if available, or dispose of product in accordance with local and provincial regulations. Before disposing of contaminated or decomposed products, refer to the "Emergency Handling" section above. For information on the disposal of unused or unwanted products, contact the manufacturer or the provincial regulatory agency.

Also contact the manufacturer or provincial regulatory agency in the event of a spill and for the clean-up of spills.

Eliminates and prevents algae growth
Quickly and continuously eliminates algae in pool water
Eliminates algae quickly and continuously in swimming pool water
Eliminates algae in pool water and prevents growth over the long run
Effective, long-lasting treatment against algae in pool water
Provides crystal clear water by eliminating bacteria and algae in pool water
Swimming pool algaecide and bactericide
Sanitizes and clarifies pool water
Protects against algae growth
Sun protected for extended chlorine life
Extended Algaecide action
Prevent green water
Kills bacteria in pool water
Long lasting algaecide
All in one Algaecide and Sanitizer
Dual action Algaecide and Sanitizer
Dual action Puck
Pool Regular Maintenance dual action puck
Worry Free Algaecide and Sanitizer
Prevents organic growth reducing chlorine demand
Leaves no residue
Softens water
Good for all pool surfaces

Floater and chlorinator use
Safe for skimmer use
Easy to use
Excellent alternative to calcium based chlorines
Excellent alternative to liquid sanitizer
Prevent Black, Yellow and Mustard algae growth
Prevent black algae
Prevent yellow algae
Prevent mustard algae
Slow dissolving tablet
Slow release formulation for easy chlorine level control
