[Optional Marketing Claims]:

Raid Defence System

Helps you work smarter, not harder, to fight bugs.

Visit raid.ca to identify your bug and best treatment plan.

[Optional Non-Chemical Control Claims][one or more of the non-chemical control claims below will be used]

- (Additional) Tips (Non-chemical Control Options):
 - Remove food spills and exposed food.
 - Store food in sealed containers.
 - Avoid accumulating (leaving) dirty dishes in sinks.

- Keep food out of bedrooms and living rooms.
- Avoid the use of mulch next to the foundation, which provides an ideal place for outdoor ants to nest and to gain entry into the home.
- Caulk any points where ants enter into wall voids, cracks and crevices including entry points from outside or neighboring units.

[Advisory Statements]:

- ([RAID® Max Double Control Ant Baits 2] (Baits) (Bait Stations) are (packed) in Child Resistant containers)

Use THIS product to (Control): Kill (Bugs) at the Source: Use (RAID® Max Double Control Ant Baits 2) indoors in corners, along walls and near entry points to kill ants where they hide. For maximum effectiveness, place all baits at the same time. Avoid placing baits directly on top of surfaces treated with a Raid spray product to make sure ants can bring the bait back to where they hide.

Use OTHER Raid® products to (Attack): Kill (Bugs) on Contact: Use a Raid Ant, Roach & Earwig spray to kill ants on contact. Avoid spraying near baits to make sure ants can bring the bait back to where they hide.

Read the label to find the right product for your bug problem.

- (Contains) (#) Child Resistant Baits
- S.C. Johnson A Family Company (logo)
- A family company since 1886 Fisk Johnson (logo)
- Kills ants where they breed
- Kills ants you see, kills ants you don't see
- Kills ants for up to three months
- 2 baits in 1: Contains two food sources ants eat.
- Keeps killing ants for up to three months.
- Adhesive secures bait (under countertops) (and) (on walls) (vertical surfaces)
- Adhesive (for) (flexible placement) (to secure) (bait) (out of sight) (in place)
- (Discreet) (Simple) Design (doesn't stand out)
- Baits work best on horizontal surfaces touching corners and walls.
- Use enclosed stickers to apply bait on a vertical surface
- (Pull) (peel) (here) for complete use directions
- Peel off label and place in a convenient location (like your calendar, refrigerator, etc.)
- Sign up for a reminder to replace baits at [website]
- This is how [RAID® Max Double Control Ant Baits 2] work
 1. Baits fit (snugly in corners) (and) along paths commonly traveled by ants
 2. Ants are attracted to the bait (to feed).
 3. Ants eat the bait and return to nesting area to die.
 4. Bait carried back to the nest is shared and continues to kill other ants.

DIRECTIONS FOR HOUSEHOLD USE: For household use to control ants indoors. The product may be applied in closets, basements, attics, recreation rooms, living areas, kitchens, bathrooms, dining rooms, pantries, food storage shelving, waste receptacles, etc.

1. Separate baits before placement. For thorough ant control, use all baits at one time. For larger areas or particularly heavy infestations, we strongly recommend using additional baits.
2. For best results, place baits where you have seen ants including in corners, under sinks, in cabinets and near plumbing fixtures. Avoid treating the baited area with other registered insecticides because ants may not be able to bring the bait back to the nest.

[Optional language to be used for adhesive - to be inserted between steps 2 and 3, with numbers adjusted accordingly (i.e. there will be 6 steps total if adhesive is included, vs only 4 steps if adhesive is not included)]

- a. To secure bait in place, on walls, or under countertops, use (included) (removable) (non-permanent) adhesive (square). (Separate squares.) Peel off (printed) liner (from one side) and place adhesive on bottom of station. (Both sides of adhesive are the same.) Apply light pressure (for a few seconds).
 - b. Peel off (blank) liner (on the other side) (of the adhesive) and secure bait where desired. Surface should be clean, smooth and dry. Apply light pressure (for a few seconds). (Do not use on wallpaper, unpainted drywall, antiques, or unfinished wood. For other surfaces, test in an inconspicuous area first.)
3. Ants will begin eating the bait immediately and you should expect to see fewer ants within days.
 4. Replace ALL baits every three months or as bait is consumed if ants continue to be a problem.

STORAGE: Store in a cool, dry area inaccessible to children. Do not store above 54.4°C.

DISPOSAL: Do not re-use empty container. Wrap in paper and dispose of empty carton and any used or damaged bait stations with household garbage. Call your local solid waste agency for disposal instructions.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN AND PETS. Do not remove bait from station. Avoid contamination of food and feed. Do not place directly over food, utensils, dishes or food preparation surfaces. Wash thoroughly with soap and water after handling.

FIRST AID: IF SWALLOWED Call a poison control centre or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.
