<<Optional wording>>

Outdoor Fresh Scent

For best results against specific insect infestations, use Raid® Crawling Insect system or Raid® Flying Insect system.

Raid Defence System

Helps you work smarter, not harder, to fight bugs.

Visit www.Raid.ca to identify your bug and best treatment plan.

Tips:

Store ant-attractive foods in plastic containers with lids that snap tight.
Keep kitchen countertops clean.
Sweep or vacuum the floor often, especially around pet dishes.
Empty kitchen garbage containers often.
Repair and seal as many visible cracks in the foundation and exterior walls of your house as possible.
Indoors, caulk along baseboards, cracks and crevices to keep the ants from passing through your house.

Use this product to: Kill (Bugs) on Contact:

Use (Raid® Ant Roach and Earwig Insect Killer 2) (this product) (indoors) to kill ants, cockroaches, and other listed insects on contact. Avoid spraying (this product) near (ant) baits to make sure ants can bring the bait back to the nest.

Use Other Raid® products to: Kill (Bugs) at the Source:

Use a Raid® Ant Bait product to kill ants where they breed. (For heavy infestations, place multiple baits.)

Kills on contact: ants, cockroaches, earwigs, fleas, spiders, centipedes, bed bugs, silverfish and crickets.

<<end of optional wording>>

DIRECTIONS FOR USE:

This product is ready to use. Always shake before use. Hold can upright while spraying.

Within the specified use location, to enhance effectiveness of this product, apply directly to listed pests where possible. For all labelled uses, treatment must only be repeated after 7 days if the pest problem persists or reoccurs. Good sanitary practices should be maintained to prevent re-infestation.

FOR INDOOR USE AT BUILDINGS:

USE LIMITATIONS: DO NOT apply to overhead areas or in confined spaces (for example, attics, crawlspaces). Ventilate treated areas after application by opening windows and doors or using fans, where required, to aid in the circulation of air. **DO NOT** apply when people or pets are present. **DO NOT** allow people or pets to enter treated areas until sprays have dried. **DO NOT** allow spray to drip or allow drift onto non-target surfaces. **DO NOT** apply to surfaces that may come into contact with food/feed. Cover or remove all food/feed. Cover all food/feed processing surfaces, equipment and utensils or thoroughly wash them following treatment. Any food/feed accidentally contaminated with spray solution must be discarded.

HOW TO APPLY: DO NOT APPLY AS A SPACE SPRAY OR BROADCAST

TREATMENT. Apply as a crack and crevice, perimeter, spot or furniture (pet bedding, mattresses, box springs and bed frames only) treatment only. Crack and crevice is an application directly into narrow openings on the surface of the structure. It does not include the treatment of exposed surfaces. Narrow openings typically occur at expansion joints, utility entry points and along baseboards and mouldings. Perimeter application is less than 0.3m wide along the edges of a room to baseboards, wall-floor and ceiling-wall joints, and around doorways or windows. Spot application is localized to a surface area not more than 0.2m². Spots are not to be adjoining and the combined area of spots is not to exceed 10% of the total surface area of a room. Furniture treatment: Broadcast application covers large areas of the entire surface of items; crack and crevice treatments are applications to junction points on items; spot application is up to 10% of the surface of the item; and tuft and/or seam treatment (mattresses only) is to the junction of two or more pieces of fabric and any decorative trim (e.g., buttons).

SURFACE APPLICATION:

DO NOT exceed 1-2 seconds per 200 cm² for all indoor surface applications.

To kill spiders, cockroaches, earwigs, crickets, centipedes, ants, and silverfish: Thoroughly treat indoor building surfaces, including cracks and crevices in walls, floors and ceilings; along and behind baseboards; walls behind and floors beneath appliances (e.g., refrigerators and stoves) and furniture (e.g., cabinets and storage units); around sinks, drains and pipes; localized areas around garbage cans; and other building elements where listed insects are found. For silverfish, also spray cracks and crevices in bookcases. Remove all objects before treatment of bookcases where books, clothing, toys, towels and other items are stored. Treated bookcases must be dry before replacing stored items. For ants, also spray trails, nests, and points of entry (e.g., around windows and doors). For spiders and centipedes, also spray localized areas of floors and floor coverings.

To kill bed bugs: **DO NOT** use on items which can be laundered (e.g., pillows, bedding, toys, clothing, etc.). Remove bedding before treating mattresses. Spray mattresses, particularly around tufts and seams. Take bed apart and spray the bed frame, spring and all joints. Treated mattresses must be dry before replacing laundered bedding. Also apply to indoor building surfaces, including cracks and crevices in walls, floor and ceilings; along and behind baseboards and mouldings; and localized areas of walls behind and floors beneath furniture (e.g., bed and nightstand).

To kill fleas: **DO NOT** apply to furniture (with the exception of pet bedding), mattresses, linens, toys or clothing. Apply to indoor building surfaces, including cracks and crevices in walls and floors; along and behind baseboards, windows and door frames; and localized areas of floors and floor coverings. Pet bedding may be entirely treated with this product or replaced with clean, fresh bedding after other listed areas are treated. **DO NOT SPRAY PETS WITH THIS PRODUCT.** Only treat pets with product specifically registered for use on that type of pet. For effective flea and tick control indoors, clean the area used by the pet. Cleaning the areas includes vacuuming floors, carpets, furniture, etc., (discard vacuum bag after use) and washing the pet's bedding, living quarters, and surrounding area.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Cover fishbowls when spraying rooms. **DO NOT** inhale this product. KEEP FROM FREEZING. CONTENTS UNDER PRESSURE. **DO NOT** puncture or incinerate the container. **DO NOT** place in hot water or near radiators, stoves or other sources of heat.

FIRST AID: **If on skin or clothing**, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. **If in eyes**, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **If swallowed**, call a poison control centre or doctor immediately for treatment advice. **DO NOT** induce vomiting unless told to do so by a poison control centre or doctor. **DO NOT** give **any** liquid to the person. **DO NOT** give anything by mouth to an unconscious person. **If inhaled**, move the person to fresh air. If the person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. Take the container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Contains petroleum distillates. Vomiting may cause aspiration pneumonia. Treat symptomatically. Skin exposure may cause transient sensations (tingling, burning, itching, numbness). Other symptoms of exposure could include respiratory effects (such as cough, respiratory irritation, or shortness of breath), nausea, headache or dizziness.

STORAGE: Store this product away from food or feed. **DO NOT** store at temperatures over 50°C.

DISPOSAL: Unused or partially used products should be disposed of at provincially or municipally designated hazardous waste disposal sites. When container is empty, press valve to release all remaining pressure. Empty containers may be recycled in communities where (steel) aerosol can recycling is available. If recycling is not available, wrap and discard the empty container in household garbage. **DO NOT** reuse the empty containers.
