Outdoor Fresh Scent

For best results against specific insect infestations, use Raid® Crawling Insect system
or Raid® Flying Insect system.

Raid Defence System

Helps you work smarter, not harder, to fight bugs.

Visit www.Raid.ca to identify your bug and best treatment plan.

Tips:

Store ant-attractive foods in plastic containers with lids that snap tight.

Keep kitchen countertops clean.

Sweep or vacuum the floor often, especially around pet dishes.

Empty kitchen garbage containers often.

Repair and seal as many visible cracks in the foundation and exterior walls of your house as possible.

Indoors, caulk along baseboards, cracks and crevices to keep the ants from passing through your house.

Use this product to: Kill (Bugs) on Contact:

Use (Raid® Max Crawling Insect Bug Killer 4) (this product) (indoors) to kill ants, cockroaches, and other listed insects on contact. Avoid spraying (this product) near (ant)baits to make sure ants can bring the bait back to the nest.

Use Other Raid® products to: Kill (Bugs) at the Source:

Use a Raid® Ant Bait product to kill ants where they breed. (For heavy infestations, place multiple baits.)

Kills on contact: Ants, cockroaches, crickets, silverfish, spiders, sowbugs, earwigs and carpet beetles.

<<end of optional wording>>

DIRECTIONS FOR USE:

This product is ready to use. Always shake before use. Hold can upright while spraying. Within the specified use location, to enhance effectiveness of this product, apply directly to listed pests where possible. For all labelled uses, treatment must only be repeated after 7 days if the pest problem persists or reoccurs. Good sanitary practices should be maintained to prevent re-infestation.

FOR INDOOR USE AT BUILDINGS:

USE LIMITATIONS: DO NOT apply to overhead areas or in confined spaces (for example, attics, crawlspaces). Ventilate treated areas after application by opening windows and doors or using fans, where required, to aid in the circulation of air. **DO NOT** apply when people or pets are present. **DO NOT** allow people or pets to enter treated areas until sprays have dried. **DO NOT** allow spray to drip or allow drift onto non-target surfaces. **DO NOT** apply to surfaces that may come into contact with food/feed. Cover or remove all food/feed. Cover all food/feed processing surfaces, equipment and utensils or thoroughly

wash them following treatment. Any food/feed accidentally contaminated with spray solution must be discarded.

HOW TO APPLY:

DO NOT APPLY AS A SPACE SPRAY OR BROADCAST TREATMENT. Apply as a crack and crevice, perimeter, or spot treatment only. Crack and crevice is an application directly into narrow openings on the surface of the structure. It does not include the treatment of exposed surfaces. Narrow openings typically occur at expansion joints, utility entry points and along baseboards and mouldings. Perimeter application is less than 0.3m wide along the edges of a room to baseboards, wall-floor and ceiling-wall joints, and around doorways or windows. Spot application is localized to a surface area not more than 0.2m². Spots are not to be adjoining and the combined area of spots is not to exceed 10% of the total surface area of a room.

Shake before use. **DO NOT** exceed the max spray rate of 1-2 seconds per 200cm² (no more than 2 sprays per day) for all indoor surface applications.

To kill spiders, sowbugs, cockroaches, crickets, earwigs, ants, and silverfish: Thoroughly treat indoor building surfaces, including cracks and crevices in walls, floors and ceilings; along and behind baseboards; walls behind and floors beneath appliances (e.g., refrigerators and stoves) and furniture (e.g., cabinets and storage units); around sinks, drains and pipes; localized areas around garbage cans; and other building elements where listed insects are found. For silverfish, also spray cracks and crevices in bookcases. Remove all objects before treatment of bookcases where books, clothing, toys, towels and other items are stored. Treated bookcases must be dry before replacing stored items. For ants, also spray trails, nests, and points of entry (e.g., around windows and doors). For spiders, also spray localized areas of floors and floor coverings.

To kill carpet beetles: Spray edges of carpeting and underneath carpets and rugs. Make localized applications to floors and baseboards.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Cover fishbowls when spraying rooms. **DO NOT** inhale this product. KEEP FROM FREEZING. CONTENTS UNDER PRESSURE. **DO NOT** puncture or incinerate the container. **DO NOT** place in hot water or near radiators, stoves or other sources of heat.

FIRST AID: **If on skin or clothing**, take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. **If in eyes**, hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **If swallowed**, call a poison control centre or doctor immediately for treatment advice. **DO NOT** induce vomiting unless told to do so by a poison control centre or doctor. **DO NOT** give **any** liquid to the person. **DO NOT** give anything by mouth to an unconscious person. **If inhaled**, move the person to fresh air. If the person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. Take the container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Contains petroleum distillates. Vomiting may cause aspiration pneumonia. Treat symptomatically. Skin exposure may cause transient sensations (tingling, burning, itching, numbness). Other symptoms of exposure could include respiratory effects (such as cough, respiratory irritation, or shortness of breath), nausea, headache or dizziness.

STORAGE: Store this product away from food or feed. **DO NOT** store at temperatures over 50°C.

DISPOSAL: Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites. When container is empty, press valve to release all remaining pressure. Empty containers may be recycled in communities where (steel) aerosol can recycling is available. If recycling is not available, wrap and discard the empty container in household garbage. **DO NOT** reuse the empty containers.
