Oak Bluff
Manitoba, R4G 0A5
Tel: (866) 860-9660

DIRECTIONS: Mix fresh solution. Made of selected fatty acids that kill insects on contact. Insects must be sprayed directly to achieve proper control. For whitefly use one part concentrate to 100 parts water. Spray all plant surfaces thoroughly at 2 week intervals. For other pests use one part concentrate to 50 parts water. For aphids and mealybugs repeat application as required. For spider mites apply once weekly for 2-3 weeks. For pear psylla in pear orchards apply 25 litres of product in 2475 litres of water per hectare (1:100 dilution). Apply when insects occur and repeat as needed. For elm leafminer make several applications late May to mid June using a 1% solution. Apply 5-10 litres per tree 3-4 days apart. Contact regional Canadian Forestry Service officials for more information on timing and spray application. Greenhouse Pepper Aphids: Use 2.0 litres product per 100 litres of water applying 250 litres of spray mixture per 4000 m² of greenhouse area. Make applications bi-monthly or when aphids reach treatment levels using concentrated high volume power sprayers. May be used on edible crops up to and including day of harvest.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Concentrated soap may cause eye irritation. Avoid eye contact. Do not use on sweetpeas, nasturtiums or delicate ferns. Wash fruits and vegetables before using. If the pest control product is to be used on a commodity that may be exported to the U.S. and you require information on acceptable residue levels in the U.S., visit CropLife Canada's web site at: www.croplife.ca. DO NOT APPLY BY AIR.

FIRST AID: If in eyes, hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

If on skin or clothing, take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

ENVIRONMENTAL HAZARDS: This product is toxic to aquatic organisms. Do not allow waste water, effluent or runoff containing this product to enter lakes, streams, ponds or other waters.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on the label. It is an offence under the *Pest Control Product Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.

The active ingredients in this product are specially selected fatty acids. No other pesticides are added.

DISPOSAL:

Do not reuse empty container for any purpose. This is a recyclable container, and is to be disposed of at a container collection site. Contact your local distributor/dealer or municipality for the location of the nearest collection site. Before taking container to collection site:

1. Triple-or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank.
2. Make the empty, rinsed container unsuitable for further uses.

If there is no container collection site in your area, dispose of the container in accordance with provincial requirements.

For information on disposal of unused, unwanted products, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
