CALYPSO TBZ

Swimming pool algaecide and bactericide

DOMESTIC
TABLET
REG. NO. 33153 P.C.P. ACT

KEEP OUT OF REACH OF CHILDREN
READ THE LABEL BEFORE USING

ACTIVE INGREDIENT:

Available chlorine, present as trichloro-s-triazinetrione..... 86.4%
Zinc, present as zinc oxide 0.4%

DANGER

POISON

**CORROSIVE
TO EYES, SKIN IRRITANT**

Strong oxidant. Contamination or improper use may cause fire, explosion or the release of toxic gases. Add product only to water. DO NOT use in feeders, floaters or any other dispensers that have been used with any other product.

NET CONTENTS: 500g - 30 kg

CALYPSO
42, rue de l'Artisan,
Victoriaville, (Québec)
G6P 7E3
1-866-470-7264

Calypso TBZ contains slow-dissolving stabilized chlorine, clarifying agent and algaecide. The triple action formula of Calypso TBZ provides continuous chlorination and effective, long-lasting protection against bacteria and algae growth in pool water. Calypso TBZ is specially formulated to help achieve and maintain crystal clear water. Calypso TBZ's triple action formula ensures continuous chlorination while clarifying water and providing long-lasting protection against bacteria and algae growth in pool water. Regular use of Calypso TBZ will help keep water crystal clear. Calypso TBZ eliminates organic matter in pool water such as sunscreen, shampoo, leaves, etc. Calypso TBZ's 3-in-1 stabilized chlorine, clarifier and algaecide formula saves on storage space at home and simplifies pool maintenance. The Calypso TBZ formula is ideal for clarifying pool water fed by artesian wells. Regular use of Calypso TBZ reduces the need for additional clarifying products to keep pool water clear. Using Calypso TBZ will make water noticeably softer to the touch.

For clear pool water, follow our 3-step pool maintenance program: Step 1: Balancing Step 2: Sanitizing and Step 3: Weekly shock treatment

DIRECTIONS FOR USE

Weight per tablet 15 to 600 g.

Use in a floating dispenser, automatic chlorinator or feeder designed for this product, or place in skimmer. Do not place directly in the pool, as it may cause vinyl or painted pool surfaces to discolor.

Check water values daily with a test kit to ensure they are at the proper levels

Free available chlorine: 1.0 – 3.0 ppm

pH: 7.2 – 7.8

Total alkalinity: 100 – 120 ppm

Calcium hardness: 200 – 300 ppm

Promptly make any necessary adjustments by using the appropriate CALYPSO pool care products.

If using an automatic chlorinator, fill the receptacle(s) with Calypso TBZ tablets and adjust the flow rate according to the manufacturer's recommendations to maintain daily chlorine residual at the desired level. Alternatively, add tablets to skimmer basket. Maintain proper daily chlorine residual by adding 50 grams of Calypso TBZ per 10 000 L of pool water, weekly or as often as needed.

NOTE: In hot weather, after rain or heavy pool use, higher doses may be needed to maintain chlorine residuals at the proper level.

Regular superchlorination of the pool water is recommended. Follow the label instructions of the CALYPSO superchlorination product used.

Calypso TBZ contains a cyanuric acid stabilizer which can accumulate in pool water. Stabilizer levels should be checked periodically with a test kit. Keep stabilizer levels within the recommended 30-100 ppm range by diluting the pool water with fresh water when necessary. Promptly make any necessary adjustments by using the appropriate CALYPSO pool care products.

OPENING YOUR POOL

Balance the pool water, perform a shock treatment, and add the CALYPSO chlorinator and algaecide according to the label instructions. Do not enter the pool until you have confirmed chlorine residual at 1 to 3 ppm with a reliable test kit or test strip.

SHOCK TREATMENT

Perform a weekly shock treatment with a CALYPSO shock product to kill bacteria and organic contaminants. Follow the label instructions on the shock treatment product. Immediately after the shock treatment, thoroughly clean all pool surfaces with a pool brush and by running the water

through the filter.

Do not enter the pool until you have confirmed chlorine residual at 1 to 3 ppm with a reliable test kit or test strip.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. DO NOT use this product so that it comes into direct contact with children or pets. Harmful or fatal if swallowed. This product is irritating to the respiratory tract. May be fatal if inhaled. Avoid inhaling dust and fumes generated by this product. Corrosive to eyes. Severely irritating to skin. DO NOT get in eyes, on skin or on clothing. Do not handle with bare hands. Wearing rubber gloves when handling this product is recommended. Wash hands before eating, drinking, chewing gum, smoking or using the toilet. Remove and wash contaminated clothing before reuse. Strong oxidizing agent. Dangerous gas formed when mixed with acid. Do not use in feeders, floaters, skimmers or any other dispensers that have been used with any other product. Do not mix with any other chemical. Do not allow product to contact any foreign matter, including other pool/spa treatment products. Do not let product get wet or damp before using. Do not add water to this product. Add product only to water. Do not mix this product in a small amount of water. If the product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and splatter. Contamination or improper use may cause fire, explosion or the release of toxic gases. Keep away from flame and burning material (like a lighted cigarette).

FIRST AID

IF SWALLOWED: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control centre or doctor for treatment advice.

IF INHALED: Move person to fresh air. If the person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control centre or doctor for treatment advice.

IF ON EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.

Take container, label or product name and Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. Treat symptomatically.

ENVIRONMENTAL HAZARDS: This product is toxic to fish and aquatic organisms. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

STORAGE Keep product dry in its tightly closed container when not in use. Store container in a cool, dry and well ventilated place. Keep container away from heat and open flame. Do not contaminate food for human or animal consumption by the improper disposal, storage or cleaning of equipment.

DISPOSAL DO NOT reuse the empty containers. Dispose in household garbage. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.

EASY 3-IN-1

Sanitizes and clarifies pool water
Eliminates algae and helps prevent future growth
Eliminates algae in pool water

Quickly and continuously eliminates algae in pool water
Destroys algae in pool water quickly and continuously
Controls algae in pool water and prevents growth over the long run
Effective, long-lasting treatment against algae in pool water
Provides crystal clear water by destroying bacteria and algae in pool water
Pool algaecide and bactericide
Helps protect against algae growth
Protects chlorine from the sun to extend its effective lifespan
Prevents green water
Kills bacteria in pool water
Long-lasting algaecide
All-in-one sanitizer, pH stabilizer and algaecide
All-in-one sanitizer and pH stabilizer
Dual action sanitizer/pH-stabilizer
Triple action tablets
Triple action tablets for routine pool care
Worry-free sanitizer and pH adjuster
Reduces the amount of chlorine needed by preventing organic growth
Leaves no residue
Safe for all pool surfaces
For use in a floater or chlorinator
Safe for use in skimmers
Easy to use
Great alternative to calcium-based sanitizers
Great alternative to liquid sanitizers
Prevents the appearance of black, yellow or mustard algae
Prevents the appearance of black algae
Prevents the appearance of yellow algae
Prevents the appearance of mustard algae
Slow dissolving tablets
Slow dissolving formula makes maintaining chlorine levels easy
Will not stain pool equipment
Will not stain pool liner
More stable pH
Helps keeps pH stable
Better regulates the release of chlorine
Steady release of chlorine
A stable pH helps to reduce chlorine consumption
Improves the efficiency of chlorine
Makes stabilizer levels easier to control
Ideal for well water-fed pools
Compatible with salt-based chlorine generators
Compatible with cartridge filters
Ideal for heated pools
Makes water feel noticeably softer
Makes water feel silky smooth
Improves the efficiency of the filtration system
Quickly resolves cloudy water in pools
Reduces the turbidity of water
Ideal for use with well water
Ensures sparkling clear water
For softer water
Pool water softener
Makes water feel silky smooth

Makes water softer to the touch
STEP 2 OF AN EASY 3-STEP MAINTENANCE SYSTEM (DRAWING 2)
