## DIRECTIONS FOR USE

Shake well before using.

### DIRECTIONS FOR USE: WEEDS

Spray weeds thoroughly, using a coarse nozzle setting to reduce drift. Thorough coverage is extremely important. For spot treatment of individual weeds, apply the solution to the center of plant to the point of runoff. When spot treating individual weeds in lawns, avoid spraying surrounding grass (lawn) as injury will occur.

The best results are obtained with young, actively growing weeds, less than 12cm high. Doktor Doom Multipurpose Lawn & Garden Weed & Moss Killer RTU works best during warm and dry conditions. Application during cold weather may delay appearance of plant damage. If rain falls within 3 hours of treatment, an additional spray may be required. Plant damage will be visible from a few hours to 2 days after spraying. Repeat treatment every 2 to 3 weeks to control new weeds growing from seed and re-growth from bi-annual and perennial weeds. Avoid spraying desirable plants. Thoroughly clean equipment after use.

### DIRECTIONS FOR USE: MOSS AND ALGAE

Shake well before using. Spray moss and algae thoroughly as complete coverage is extremely important. Plant damage will be visible from a few hours to 2 days after spraying. One application may control moss for up to one year. Repeat treatment if re-growth occurs. Avoid spraying desirable plants. Do not apply to moss or algae in lawns. Thoroughly clean equipment after use.
