DIRECTIONS FOR USE:

General Information: Permethrin is a synthetic version of pyrethrins. Pyrethrins have long been known for rapid knockdown of insects. Although permethrin is more stable than pyrethrins, it is still degraded by the ultraviolet rays of the sun. This results in a relatively short residual life in the presence of sunlight. When protected from the sun, permethrin will provide residual/long-lasting activity. This product is ready to use. Within the specified location of use, apply directly to listed pests where possible to enhance effectiveness of this product.

Restrictions: DO NOT apply to any body of water. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes. Avoid application of this product when winds are gusty. DO NOT contaminate food/feed. DO NOT apply to surfaces that may come into contact with food/feed. DO NOT apply when people or pets are present. DO NOT allow people or pets to enter treated areas until sprays have dried. DO NOT allow spray to drip or allow drift onto non-target surfaces. DO NOT apply to people, pets, livestock or sources of electricity. DO NOT apply to furniture (excluding bookcases and storage furniture), mattresses, linens, toys or clothing. DO NOT apply to overhead areas or in confined spaces (e.g., attics, crawlspaces, small storage rooms, closets). Ventilate treated areas after application by opening windows and doors, or using fans where required to aid in the circulation of air. DO NOT apply in areas where plants are grown for food or feed (e.g., vegetables, fruit, herbs). DO NOT apply as a space spray or broadcast application.

How to apply: Shake well before using. Test a small inconspicuous area of the surface to be treated for colour fastness and staining before full application. Do not apply to draperies, wallpaper or similar materials that may stain. Hold container approximately 30 cm from surface being sprayed and spray until wet. Thorough applications produce a coating which will vaporize into cracks and crevices for insect control. Apply as a crack and crevice or spot treatment only. **Spot application** is localized to a surface area not more than 0.2 m². Spots are not to be adjoining. The combined area of spots is not to exceed 10% of the total surface area of a room. **Crack and crevice** is an application directly into narrow openings on the surface of the structure. It does not include the treatment of exposed surfaces. Narrow openings typically occur at expansion joints, utility entry points and along baseboards and mouldings.

For indoor use:

To kill ants, cockroaches, earwigs, silverfish, sowbugs, spiders, and to control crickets: Thoroughly treat inside building surfaces including cracks, crevices in walls, floors and ceilings, beneath furniture (e.g., shelves and drawers). For ants, cockroaches, silverfish, sowbugs and spiders, also spray along door sills, baseboards and openings around sinks, drains and pipes, behind stoves and refrigerators, around window frames, in localized areas of attics and basements, and around interior foundations. For silverfish, also spray cracks and crevices in bookcases. Remove all objects before treatment of bookcases where books, clothing, toys, towels and other items are stored. Treated bookcases must be dry before replacing stored items. For ants, also spray trails, nests and points of entry. Treatment must only be repeated after 7 days if pest problem persists or reoccurs.

To control carpet beetles: Spray edges of carpeting and under carpeting and rugs for approximately 10 seconds. Make localized application to floor and baseboards. Spray directly into cracks, crevices

and infested areas of shelving. Treatment must only be repeated after 7 days if pest problem persists or reoccurs.

To kill fleas (adults and larvae) and brown dog ticks (adults and nymphs): Apply to indoor building surfaces, including cracks and crevices in walls and floors, along and behind baseboards, mouldings, and window and door frames. Pet bedding may be entirely treated with this product or replaced with clean, fresh bedding after other listed areas are treated. Treatment must only be repeated after 7 days if pest problem persists or reoccurs. **DO NOT SPRAY PETS WITH THIS PRODUCT.** Only treat pets with products specifically registered for use on that type of pet. For effective flea and tick control indoors, clean any area used by the pet. Cleaning the areas includes vacuuming floors, carpets, furniture, etc. (discard vacuum bag after use) and washing the pet's bedding, living quarters, and surrounding area.

To kill bed bugs: Apply spray directly to inside building surfaces including, cracks and crevices in the walls, floors and ceilings, along and behind baseboards and mouldings, and localized areas of walls behind and floors beneath furniture (e.g., bed and nightstand). Do not apply to the mattress, headboard, footboard or other furniture. To enhance effectiveness of this product, apply directly to bed bugs where possible. Treatment must only be repeated after 7 days if pest problem persists or reoccurs.

For outdoor use:

To kill ants, fleas, spiders, sowbugs, brown dog ticks, and to control crickets: For use outdoors on the exterior surfaces of buildings and on patios, porches and decks. Apply to the outside surfaces of foundations, under eaves troughs, around light fixtures and places where listed pests enter (e.g., screens, doors, window frames). This product may also be applied to garbage cans and localized areas of patios, porches and decks. For ants, spray onto ant trails, into ant nests and at points of entry. Treatment must only be repeated after 14 days if pest problem persists or reoccurs. Application to vinyl and aluminum siding (particularly lightly coloured, aged, weathered or otherwise damaged) may result in staining, bleaching or discolouration. Factors such as extreme heat and direct sunlight can promote damage. Always pre-test a small inconspicuous area to be treated, for colour fastness and staining. Pre-test siding. Evaluate 30 minutes after test application for potential staining. Never apply to vinyl or aluminum siding while exposed to direct sunlight or during the heat of day. Do not apply to tapestries, wallpaper or similar materials that may stain.

To kill house flies: Apply as a spot treatment only. Spray spots on outside surfaces of foundations, under eaves troughs, around light fixtures and places where house flies enter (e.g., screens, doors, window frames). Houseflies will be killed when they land and crawl on the treated surfaces. Treatment must only be repeated after 14 days if pest problem persists or reoccurs.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Contents under pressure. Do not place in hot water or near radiators, stoves or other sources of heat, or store at temperatures over 50 °C. Cover fish aquariums and remove pets for one hour when spraying rooms. Avoid contact with skin, eyes, clothing. Avoid inhalation of spray. Wash after using. Keep from freezing. Do not use this product in or on electrical equipment due to possibility of shock hazard.

ENVIRONMENTAL PRECAUTIONS: Toxic to aquatic organisms, birds, bees and beneficial insects.

FIRST AID: **If in eyes,** hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **If on skin or clothing,** take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **If swallowed,** call a poison control centre or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give **any** liquid to the person. Do not give anything by mouth to an unconscious person. Take container, label or product name and P.C. P. Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: This product contains petroleum distillates. Vomiting may cause aspiration pneumonia. Treat symptomatically.

DISPOSAL: When container is empty, press valve to release all remaining pressure. Wrap and discard empty container in household garbage. Do not puncture or incinerate.

For additional product information or in case of emergency, spills or fire, call toll-free 1-800-268-2806. www.wilsoncontrol.com
