Brominating tablets when used as directed, are effective as a hot tub water sanitizer and disinfectant.

DIRECTIONS FOR USE:

Weight per tablet: 20g

WARNING: Direct tablet contact may cause bleaching of vinyl, acrylic or synthetic hot tub surfaces. Automatic feeding devices employing these tablets must be totally free from traces of other hot tub sanitizers to avoid the probability of an explosion.

1. Maintain recommended daily levels as determined by testing kit.
 - Free available bromine: 3.0 - 5.0 ppm
 - pH: 7.2 - 7.8
 - Total alkalinity: 100 - 150 ppm
 - Calcium hardness: 100 - 200 ppm
2. If using an automatic feeding device, fill the chamber(s) with tablets and adjust flow rate according to manufacturer's recommendations to maintain proper bromine residual. Adding tablets to the hot tub's skimmer basket is an alternative bromine feed method. Daily usage should approximate 5g of Mineraluxe™ Hot Tub Bromine Tablets per 1,000L of hot tub water. NOTE: Heavy hot tub usage and higher temperatures may require higher usage rates to maintain proper bromine residuals.
3. Periodic superchlorination of hot tub water is recommended. Follow label instructions of superchlorination product being employed.
4. Persistent foam formation, turbid or malodorous water are indicators of inadequate sanitizer levels. To correct such conditions, superchlorinate hot tub water by adding superchlorination product. Maintain circulation at least 30 minutes and wait 4 hours before using.
5. For proper sanitation, hot tub must be completely drained periodically. The number of days between COMPLETE HOT TUB DRAINAGE is equal to the volume of hot tub water in litres, divided by 10 times the maximum number of daily hot tub users. Refill hot tub with water and repeat DIRECTIONS FOR USE. Maximum hot tub water usage temperature is 40°C. Duration in hot tub water, at 40°C, should not exceed 15 minutes.

Note: Do not contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN. Corrosive to the eye and skin. DO NOT get in eyes or on skin. Potential skin sensitizer Causes eye damage and skin burns. Skin exposure to dust may cause allergic skin reaction in some individuals. Harmful or fatal if swallowed. DO NOT swallow. Dust may be harmful or fatal if inhaled. DO NOT breathe dust. Strong oxidizing agent. May cause fire or explosion if contaminated. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Keep container closed and store in a cool, dry location. It is recommended to wear rubber gloves and goggles when handling the product.

FIRST AID

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. Call a poison control centre or doctor for further treatment advice. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control centre or doctor for treatment advice. If irritation or other adverse effects develop, wash with soap and water immediately. Seek medical attention if symptoms persist. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **IF SWALLOWED:** Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION

Treat symptomatically.

DISPOSAL

Do not reuse empty container. Wrap and dispose of empty container with household garbage. For information on disposal of unused, unwanted product, contact the manufacturer or the Provincial Regulatory Agency. Contact the manufacturer and the Provincial Regulatory Agency in case of a spill and for clean-up of spills.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters.a
