[Permethrin is a synthetic version of pyrethrins. Pyrethrins have long been known for their low mammalian toxicity and rapid knockdown of insects. Like the pyrethrins on which it is based, permethrin has retained a low level of toxicity to mammals; however, the synthetic process has increased the stability of the chemical giving it residual properties.]

GENERAL DIRECTIONS: SHAKE CONTAINER WELL. [Gently insert [or use] the [wand or applicator wand or extension tube or applicator hose or jet tube] into the spray nozzle before using.] This product is designed for applying into cracks, crevices or voids that are difficult to reach and where the insecticide won't be mopped away. The foaming action of this formula completely fills tight crevices leaving an insecticidal active residue. [Test a small inconspicuous area of the surface to be treated for color fastness & staining before full application. Do not apply to draperies, wall paper or similar materials that may be stained.]

FOR INDOOR USE: TO KILL ANTS: Thoroughly treat inside building surfaces including cracks, crevices in walls, floors and ceilings, beneath furniture (e.g. shelves and drawers). Also spray along door sills, baseboards and openings around sinks, drains and pipes, behind stoves and refrigerators, around window frames, in localized areas of attics and basements and around interior foundations. Also spray trails, nest and points of entry. Treatment must only be repeated after 7 days if pest problem persists or reoccurs.

FOR OUTDOOR USE: TO KILL ANTS ON THE EXTERIOR SURFACES OF BUILDINGS AND ON PATIOS, PORCHES AND DECKS: Apply to the outside surfaces of foundations, under eaves troughs, around light fixtures, and places where listed pests enter (e.g., screens, doors, window frames). This product may also be applied to garbage cans and localized areas of patios, porches and decks. Spray onto ant trails, into ant nests and points of entry. Treatment must only be repeated after 14 days if pest problem persists or reoccurs. [Application to vinyl and aluminum siding [particularly lightly colored, aged, weathered or otherwise damaged] may result in staining, bleaching or discoloration. Factors such as extreme heat and direct sunlight can promote damage. Always pre-test a small inconspicuous area to be treated, for colour fastness and staining. Pre-test siding. Evaluate 30 minutes after test application for potential staining. Never apply to vinyl or aluminum siding while exposed to direct sunlight or during the heat of day. Do not apply to tapestries, wall paper or similar materials that may stain.]

FOR OUTDOOR USE: TO KILL ANTS IN ANT HILLS. Gently insert the [wand or applicator wand or extension tube or applicator hose or jet tube] as far as possible into hills, mounds, cracks, crevices, gaps,

2020-0685
2020-06-17

voids and trails in driveways, patios, sidewalks, or interlocking brick where ants hide. [Pull or Push or Depress] [trigger or nozzle] and allow foam to fill the area. Stop spraying when the foam comes back out the crack or crevice. For best results, treat all cracks and crevices in the area where ants are found. Spray trails, nests and points of entry. Treatment must only be repeated after 7 days if pest problem persists or reoccurs

DO NOT apply as a space spray or broadcast application. Apply ONLY as a spot, crack and crevice or void treatment. Spot application is localized to a surface area not more than 0.2 m². Spots are not to be adjoining. The combined area of spots is not to exceed 10% of the total surface area of a room. Crack and crevice is an application directly into narrow openings on the surface of the structure. It does not include the treatment of exposed surfaces. Narrow openings typically occur at expansion joints, utility entry points and along baseboards and mouldings. Void application applies to inaccessible, enclosed empty spaces of a structure.

Restrictions:

DO NOT apply to any body of water. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes. Avoid application of this product when winds are gusty. DO NOT contaminate food/feed. DO NOT apply to surfaces that may come into contact with food/feed. Unless otherwise stated on this label, DO NOT apply to furniture (excluding bed frames, bookcases and storage furniture), mattresses, linens, toys or clothing. When applied indoors, DO NOT apply to overhead areas or in confined spaces (for example, attics, crawlspaces, small storage rooms, closets). When applied indoors, ventilate treated areas after application by opening windows and doors, or using fans where required to aid in the circulation of air. DO NOT apply when people, pets or livestock are present. DO NOT allow people, pets or livestock to enter treated areas until sprays have dried. DO NOT allow spray to drip or allow drift onto non-target surfaces. DO NOT apply to people, pets, livestock or sources of electricity. DO NOT apply as a space spray or broadcast application. When applied outdoors, DO NOT apply in areas where plants are grown for food or feed (e.g., vegetables, fruit, herbs).

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Contents under pressure. Do not place in hot water or near radiators, stoves or other sources of heat, or store at temperatures over 50°C. Cover fish bowls when spraying rooms. In homes or dwellings, remove or cover all exposed foods and cooking utensils before spraying. After use, wash all surfaces that may contact food. Avoid contact with skin, eyes, clothing. Avoid inhalation of spray. Wash after using. Keep from freezing. **DO NOT USE THIS PRODUCT IN OR ON ELECTRICAL EQUIPMENT DUE TO POSSIBILITY OF SHOCK HAZARD.**
