**AQUA DUO**

*\*Sentences marketing from page 5*

DOMESTIC

**TABLET**

Sanitizer Algaecide

REG. NO. 34664 P.C.P. ACT

ACTIVE INGREDIENT:

Available chlorine, present as trichloro-s-triazinetriene and sodium dichloro-s-triazinetriene... 77.5%  
Zinc present as zinc oxide... 0.4%

**DANGER**

**POISON**

**CORROSIVE TO EYES  
SKIN IRRITANT**

Strong oxidant. Contamination or improper use may cause fire, explosion or the release of toxic gases. Add product only to water. DO NOT use in feeders, floaters or any other dispensers that have been used with any other product.

**KEEP OUT OF REACH OF CHILDREN  
READ THE LABEL BEFORE USING**

NET CONTENTS: 500g - 30 kg

AQUA DUO contains slow-dissolving stabilized chlorine and a protective agent reducing chlorine loss due to UV rays. The triple action formula of AQUA DUO provides continuous chlorination and effective, long-lasting protection against bacteria and algae growth in pool water. Regular use of AQUA DUO will keep water crystal clear while providing effective, long-lasting protection against green water problems. AQUA DUO destroys organic matter in pool water such as sunscreen, shampoo, leaves, etc. AQUA DUO two-stage chlorine release formula and added algaecide make maintaining chlorine levels and controlling algae in pools easy. AQUA DUO also saves on storage space at home and simplifies pool maintenance. The zinc contained in AQUA DUO makes water feel silky smooth and leaves skin feeling soft. AQUA DUO is a sanitizer formulated with two types of chlorine - one fast-dissolving and the other slow-dissolving - that work together to maintain constant water disinfection. This dual action ensures greater stability of water parameters and facilitates weekly pool water maintenance.

For clear pool water, follow our 3-step pool maintenance program: Step 1: Balancing Step 2: Sanitizing and Step 3: Weekly shock treatment

### **DIRECTIONS FOR USE**

Weight per tablet 15 to 600 g

Use in a floating dispenser, automatic chlorinator or feeder designed for this product, or place in skimmer. Do not place directly in the pool, as it may cause vinyl or painted pool surfaces to discolor.

Check water values daily with a test kit to make sure they are at the proper levels.

Free available chlorine: 1.0 – 3.0 ppm

pH: 7.2 – 7.8

Total alkalinity: 100 – 120 ppm

Calcium hardness: 200 – 300 ppm

Promptly make any necessary adjustments by using the appropriate IPG pool care products.

If using an automatic chlorinator, fill the receptacle(s) with AQUA DUO tablets and adjust the flow rate according to the manufacturer's recommendations to maintain daily chlorine residual at the desired level. Alternatively, add tablets to skimmer basket. Maintain proper daily chlorine residual by adding 25 grams of AQUA DUO per 10 000 L of pool water, as often as needed. Add one dose every week according to the chosen application method and recommended dosage. Weekly usage should approximate 75 g of AQUA DUO per 10,000 L of pool water. Note that the chlorine remains present in water after the puck has completely dissolved.

**NOTE:** In hot weather, after rain or heavy pool use, higher doses may be needed to maintain chlorine residual at the proper level.

Regular superchlorination of the pool water is recommended. Follow the label instructions of the IPG superchlorination product used.

AQUA DUO contains a cyanuric acid stabilizer which can accumulate in pool water. Stabilizer levels should be checked periodically with a test kit. Keep stabilizer levels within the recommended 30-100 ppm range by diluting the pool water with fresh water when necessary. Promptly make any necessary adjustments by using the appropriate IPG pool care products.

DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

### **OPENING YOUR POOL**

Balance the pool water, perform a shock treatment, and add the IPG chlorinator and algaecide according to the label instructions. Do not enter the pool until you have confirmed chlorine residual at 1 to 3 ppm with a reliable test kit or test strip.

### **SHOCK TREATMENT**

Perform a weekly shock treatment with a IPG shock product to kill bacteria and organic contaminants and to keep water clear. Follow the label instructions on the shock treatment product. Immediately after the shock treatment, thoroughly clean all pool surfaces with a pool brush and by running the water through the filter. Do not enter the pool until you have confirmed chlorine residual at 1 to 3 ppm using a reliable test kit or test strip.

### **PRECAUTIONS:**

**KEEP OUT OF REACH OF CHILDREN.** DO NOT use this product so that it comes into direct contact with children or pets. Harmful or fatal if swallowed. This product is irritating to the respiratory tract. May be fatal if inhaled. Avoid inhaling dust and fumes generated by this product.

Corrosive to eyes. Severely irritating to the skin. DO NOT get in eyes, on skin or on clothing. Do not handle with bare hands. Wearing rubber gloves when handling this product is recommended. Wash hands before eating, drinking, chewing gum, smoking or using the toilet. Remove and wash contaminated clothing before reuse. Strong oxidizing agent. Dangerous gas formed when mixed with acid. Do not use this product in feeders, floaters, skimmers or any other dispensers that have been used with any other product. Do not mix with any other chemical. Do not allow product to contact any foreign matter, including other pool/spa treatment products. Do not let product get wet or damp before using. Do not add water to this product. Add product only to water. Do not mix this product in a small amount of water. If the product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and splatter. Contamination or improper use may cause fire, explosion or the release of toxic gases. Keep away from flame and burning material (like a lighted cigarette).

### **FIRST AID**

**IF SWALLOWED:** Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person.

**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 to 20 minutes. Call a poison control centre or doctor for treatment advice.

**IF INHALED:** Move person to fresh air. If the person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control centre or doctor for treatment advice.

**IF ON EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice.  
Take container, label or product name and Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** Probable mucosal damage may contraindicate the use of gastric lavage. Treat symptomatically.

**ENVIRONMENTAL PRECAUTIONS:** This product is toxic to fish and aquatic organisms. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.

**STORAGE** Keep this product dry in its tightly closed container when not in use. Store container in a cool, dry and well ventilated place. Keep container away from heat and open flame. Do not contaminate food for human or animal consumption by the improper disposal, storage or cleaning of equipment. To prevent contamination store this product away from food or feed.

**DISPOSAL** DO NOT reuse the empty containers. Dispose in household garbage. Unused or partially used products should be disposed at provincially or municipally designated hazardous waste disposal sites.

EASY 3-IN-1  
Sanitizer Algaecide  
Sanitizes and clarifies pool water  
Eliminates algae and helps prevent future growth  
Quickly and continuously eliminates algae in pool water  
Destroys algae in pool water quickly and continuously  
Controls algae in pool water and prevents growth over the long run  
Effective, long-lasting treatment against algae in pool water  
Provides crystal clear water by destroying bacteria and algae in pool water  
Pool bactericide  
Helps protect against algae growth  
Protects chlorine from the sun to extend its effective lifespan  
Prevents green water  
Kills bacteria in pool water  
Triple sanitizing action  
Triple action tablets  
Will not stain pool equipment  
Triple action tablets for routine pool care  
Worry-free sanitizer  
Reduces the amount of chlorine needed by preventing organic growth  
Leaves no residue  
Softens water  
Safe for all pool surfaces  
For use in a floater or chlorinator  
Safe for use in skimmers  
Easy to use  
Great alternative to calcium-based sanitizers  
Great alternative to liquid sanitizers  
Prevents the appearance of black, yellow or mustard algae  
Prevents the appearance of black algae  
Prevents the appearance of yellow algae  
Prevents the appearance of mustard algae  
Controlled dissolving tablets  
Controlled dissolving formula makes maintaining chlorine levels easy  
Continuous chlorine release tablets  
2-stage chlorine release  
Reduces the formation of chloramines  
Destroys organic waste quickly  
Pool algaecide and bactericide  
Long-lasting algaecide  
Worry-free algaecide and sanitizer  
Controls bacteria and algae in swimming pool water  
Destroys algae with a zinc oxide innovative technology  
Maintain a constant chlorine level due to his two-stage dissolving

**STEP 2 OF AN EASY 3-STEP MAINTENANCE  
SYSTEM (DRAWING 2)**
