BIOGUARD®

SANITIZER

BROMINE TABS 2

CONTROLS BACTERIA AND ALGAE IN SWIMMING POOL WATER.

DOMESTIC

Algicide and Bactericide

ACTIVE
INGREDIENTS:

Available Bromine, present as 1-Bromo-3-Chloro-5,5-Dimethylhydantoin and related
hydantoins..... 68.4%

Available Chlorine, present as 1-Bromo-3-Chloro-5,5-Dimethylhydantoin and related
hydantoins..... 28.2%

REG. NO. 35319 P.C.P. ACT

POISON CORROSIVE

DANGER - CORROSIVE TO EYES AND SKIN

POTENTIAL SKIN SENSITIZER

IRRITANT, DANGEROUS GAS FORMED WHEN MIXED WITH ACID

READ THE LABEL BEFORE USING

KEEP OUT OF REACH OF CHILDREN

NET CONTENTS: 2 to 18 kg

BIOGUARD® SANITIZER BROMINE TABS 2 Approximate tablet weight [20 g] [100 g].

BioGuard® Sanitizer Brome Tabs 2, when used as directed, are effective as a swimming pool water sanitizer.

WARNING: Direct tablet contact may cause bleaching of vinyl or painted pool surfaces. Automatic feeding devices employing these tabs must be totally free from traces of other pool sanitizers to avoid the probability of an explosion.

DIRECTIONS FOR USE:

NOTE: Check expiry date of the test kit as test results may be inaccurate if used after that date. In newly filled pools, shock the pool if necessary with a non-chlorine shock.

1. Maintain recommended daily levels as determined by testing kit.

Free available bromine:	2.0 – 4.0 ppm
pH:	7.2 – 7.8
Total Alkalinity:	100 – 150 ppm
Calcium Hardness:	150 – 300 ppm

2. If using an automatic feeding device, fill the chamber(s) with tabs and adjust flow rate according to manufacturer's recommendations, to maintain proper bromine residual. Adding tabs to the pool's skimmer basket is an alternative bromine method. Daily usage should be approximately 25 g of **BioGuard® Sanitizer Bromine Tabs 2** per 10,000 L of pool water.

NOTE: Heavy pool usage and higher temperatures may require higher usage rates to maintain proper bromine residuals. Actual use rates vary depending on organic load and environmental conditions. The regular use of a good test kit will determine if further adjustments are needed. Do not swim in the water if the residual is above 5.0 ppm.

3. Periodic superchlorination of pool water is recommended. Follow label instructions of superchlorination product being employed.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. IRRITANT, DANGEROUS GAS FORMED WHEN MIXED WITH ACID. Fatal or poisonous if swallowed. May be fatal if inhaled. DO NOT inhale dust or vapors. Corrosive to the eyes and skin. Potential skin sensitizer. DO NOT get in eyes, skin or clothing. It is recommended to wear rubber gloves and goggles when handling the product. Wash hands thoroughly after handling. Remove and wash contaminated clothing.

FIRST AID: If swallowed: Call a poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control centre or doctor. Do not give anything by mouth to an unconscious person. **If in eyes:** Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control centre or doctor for treatment advice. **If on skin or clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control centre or doctor for treatment advice. **If inhaled:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if

possible. Call a poison control centre or doctor for further treatment advice.

Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. This product is corrosive to skin and eyes and may produce a sensitization response or allergic reaction in some individuals. Treat symptomatically.

STORAGE: Keep product dry in tightly closed original container when not in use. Store in a cool, dry, well ventilated area, away from heat, open flame, sunlight and other chemicals. Store this product away from food or feed.

DISPOSAL: DO NOT reuse the empty containers. Dispose in household garbage. Unused or partially used products should be disposed at provincially/territorially or municipally designated hazardous waste disposal sites.

PHYSICAL AND CHEMICAL HAZARDS: Strong oxidizing agent. Mix only with water. Use clean, dry utensils and equipment. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals may start a chemical reaction with the generation of heat, hazardous gases, and possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. If necessary, flood with large volumes of water.

ENVIRONMENTAL PRECAUTIONS: This product is toxic to fish. Do not discharge into lakes, streams, ponds or public waters. DO NOT contaminate irrigation or drinking water supplies or aquatic habitats by cleaning of equipment or disposal of wastes.
