PEST CONTROL PRODUCTS ACT

PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. May be absorbed through the skin. Causes skin irritation. Avoid contact with eyes, skin, or clothing.

NOTICE TO USER

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

DIRECTIONS

For manufacturing use in rendering textiles resistant to the

growth of bacteria. It inhibits the development of body odours on treated fabrics. UltraFresh's bacteriostatic activity will last through at least 75 conventional launderings.

FABRIC - UltraFresh 300 Cationic should be added at a level of 2.5% on the weight of the goods. The bath ratio is not critical. UltraFresh 300 Cationic can be added in the same bath as cationic or nonionic softeners or antistatics. UltraFresh 300 Cationic should be added to the cold liquor (room temperature), run for 10 minutes cold, and then the temperature raised to 50'C over a period of 20 minutes. The bath is maintained at this temperature for a further 20 minutes, and then dropped.

YARN - Yarn can be treated in package form also. The UltraFresh 300 Cationic is added to the cool liquor at a level of 2.5% on the weight of the goods. The liquor is circulated cold (room temperature) for 10 minutes then the temperature increased to 50'C over 20 minutes. The liquor is maintained at this temperature for 20 minutes, following which the liquor is dropped. Cationic or nonionic softeners or antistatic agents can be added in the same liquor as the UltraFresh 300 Cationic.

FELT - With felt production, the UltraFresh 300 Cationic can be sprayed in the picker. The level of UltraFresh 300 DD Cationic in the spray solution depends on the moisture level that is added to the felt, and is adjusted to give a final level of 2.5% on the weight of the felt.

FIRST AID:

In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or, if these are not available, drink large quantities of water. Avoid alcohol. Call a physician or a poison control centre immediately. (Never give anything by mouth to an unconscious person).

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to the treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
3. Make the empty container unsuitable for further use.
4. Dispose of the container in accordance with provincial requirements.
5. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.
