Used as directed, BOVAID (R) EAR TAGS will provide season-long control of horn flies* and will reduce populations of face flies. Significant gains in weight and milk yield can be achieved with BOVAID. Adequate control of face flies may reduce pinkeye infections.

DIRECTIONS:

- a) For maximum benefit, apply early each spring but not before May 1. Delaying application until fly populations have built up may result in some loss of control.
- b) The entire herd must be tagged to control flies as claimed.
- c) Rate to use:
 - Horn Flies - tag 1 ear
 - Face Flies - tag both ears
- d) Remove tags at the end of the season and before slaughter.
- e) Dip pliers with stud into a disinfectant between tagging of each animal.

APPLICATION PROCEDURE:

BOVAID EAR TAGS can be conveniently applied with the ALLFLEX TAGGING SYSTEM (TM). Assemble unit and position tag on the firm flat surface, in the centre of the ear between the ribs. Make sure the shaft of the male tag does not penetrate a rib or blood vessel.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. This product contains 28.3% of DIOCTYL ADIPATE which has been determined to be of toxicological concern. Avoid contact with eyes, skin or mouth. Wear plastic/rubber gloves during application and wash hands thoroughly after tagging is completed. Store unused tags in original carton away from heat.

FIRST AID:

If skin irritation occurs, wash immediately with soap and water. If eye irritation occurs, flush eyes thoroughly with water. If swallowed, do not induce vomiting. Contact physician immediately, taking BOVAID EAR TAG carton.

TOXICOLOGICAL INFORMATION:

The treatment should be primarily symptomatic and supportive.

DISPOSAL:

The insecticide in BOVAID EAR TAGS is highly toxic to fish. Collect used tags and dispose of according to municipal and provincial regulations. Do not dispose of used tags near a source of water.

1. After the carton is empty, make it unsuitable for further use by crushing.
2. Dispose of the carton and pouch in accordance with provincial requirements.
3. For information on the disposal of unused, unwanted product, and the cleanup of spills, contact the regional office of Conservation and Protection, Environment Canada.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the PEST CONTROL PRODUCTS ACT to use a control product under unsafe conditions.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

* Certain strains of horn flies have exhibited tolerance to pyrethroid family insecticides and thus may not be controlled.
