PRECAUTIONS:

- . Keep out of reach of children
- . Dangerous gas formed when mixed with acid.
- . Do not mix with any other chemical.
- . Avoid contact with skin and eyes.
- . Harmful if swallowed.
- . Keep container closed and store in a cool location.
- . Rinse container thoroughly before discarding. Do not reuse.
- . To dispose of chemical, flush into sewer with large quantities of water.

DIRECTIONS FOR USE:

1. Maintain recommended daily levels as determined by testing kit.

Free available chlorine:	1.0 - 3.0 ppm
pH:	7.2 - 7.8
Total Alkalinity:	100 - 120 ppm
Calcium Hardness:	200 - 300 ppm

2. Initially superchlorinate pool water by adding to the pool 1 L of Chlorinating Liquid per 10,000 L of pool water. For best results superchlorinate at dusk.
3. Chlorinate daily to maintain proper chlorine residual with 250 mL of Chlorinating Liquid per 10,000 litres of pool water, or as needed.

NOTE: Hot weather, heavy pool usage, and rain may require higher usage rates to maintain proper chlorine residuals.

4. Superchlorinate weekly with 1 L per 10,000 litres when average daily temperature is 25'C - 32'C. Otherwise, superchlorinate every other week.
5. For visible algae superchlorinate using 3 L of Chlorinating Liquid per 10,000 L of pool water. Vacuum pool when dead algae settles.
6. For wading pools, chlorinate daily to maintain a chlorine residual of 3-5 ppm by adding 45.0 mL of Chlorinating Liquid per 1000 L of pool water, or as needed.

NOTE: For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of stabilizer (cyanuric acid).

FIRST AID: If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, drink one glass of milk or water. Call a Physician IMMEDIATELY.
