This is an effective germicidal cleaner against a wide range of microorganisms. It displays excellent detergency in all types of water, hard or soft.

Kills Staphylococcus Aureus at a concentration of -12 mL per litre

Kills Salmonella Choleraesuis at a concentration of -12 mL per litre

Kills Salmonella Typhosa at a concentration of - 18 mL per litre

DIRECTIONS: Use 6 mL per litre for general cleaning operations in

schools and institutions. Increase to 18 mL where the destruction of bacteria is important.

FREEZING: The usual precautions against freezing should be taken. When the product is cooled to temperatures below 5°C the germicide tends to crystallize. The effectiveness of the product is not adversely affected provided it is warmed to room temperature and well shaken or agitated to redissolve any germicide that may have precipitated.

PRECAUTION: Avoid contact with full strength material. DANGER - corrosive to the eye. In case of accidental splashing in eyes, flush with copious quantities of water. If after continuous use, hand irritation should occur, rubber or plastic gloves are recommended.

FIRST AID: If accidentally ingested, call a physician and give milk or cornstarch slurry as antidote. If full strength material is accidentally splashed on the skin, wash with soap and water and rinse in lukewarm water. Never give anything by mouth to an unconscious person.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information.
