ZEPOSECTOR SPRAY INSECTICIDE is a product designed especially for use in cafes, restaurants, food storage warehouses, flour mills, and meat packing plants during shut down periods. In food processing plants and food storage establishments, apply only when the plant is NOT in operation. Remove all food before treatment. Cover all food processing surfaces and thoroughly clean with potable water before resuming operations. In homes or dwellings, remove or cover all exposed food and cooking utensils before spraying.

DIRECTIONS FOR USE:

SPACE SPRAY: To kill flies, mosquitoes, and gnats: Cover or remove exposed food and food handling surfaces. Close the room and shut off air conditioning or ventilation equipment. Apply with mechanical compressed air sprayer, or with fogger which gives small particle size. Direct spray upwards toward upper corners of the room and ceiling. Apply at the rate of 50 to 100 mL per 100 cu. m of space to be treated. Leave the room closed for one half hour. Do not remain in treated areas and ventilate thoroughly before re-entry. Repeat as necessary for insect control.

CONTACT OR SURFACE SPRAY: To kill cockroaches, silverfish, and ants: Cover or remove food, before application as described under space spray. Apply with a sprayer that gives large wet droplets. Force spray into cracks and crevices in walls and floor, areas at base of machinery, behind cabinets, around pipes and openings, along baseboards and other insect harbourages. Use 200 mL of spray per 100 sq. m of surface to be treated. For ants spray trails and all points of entry into the building. Spray ant-nests directly with soaking application. In all cases contact as many insects as possible directly with the spray. Repeat applications as necessary for control.

CAUTION: KEEP OUT OF REACH OF CHILDREN

HARMFUL IF SWALLOWED. THIS PRODUCT CONTAINS PETROLEUM DISTILLATES. IF SWALLOWED, DO NOT INDUCE VOMITING. GET PROMPT MEDICAL ATTENTION. WEAR MASK OR RESPIRATOR AND PROTECTIVE CLOTHING. Do not use near open flame. Do not spray directly into exposed food. Cover or remove fishbowls and aquaria before and for approximately one hour after treatment. Keep away from domestic animals. Do not use, pour, spill or store near heat or open flame. Do not re-use empty container.

FIRST AID:

In case of contact with skin, wash immediately with soap and water. If splashed in eyes, flush with water for 15 minutes. Seek medical attention immediately. If swallowed do not induce vomiting, seek medical attention immediately.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.
