WILSON'S GRANULAR VEGETATION KILLER:

Is specifically designed for quick knockdown and kill of weeds and grasses, on driveways, sidewalks, patios and may provide season-long control of seedlings on treated areas. Ideal for parking lots, railroad sidings, industrial yards or where no growth is desired. Do not use in gardens or on lawns.

DIRECTIONS FOR USE: WILSON'S GRANULAR VEGETATION KILLER can be applied dry, directly from this shaker can, or dissolved in water and applied with a watering can. Both dry and spray applications become effective following rainfall or watering. Treatment is more effective when soil is moist and weeds are young.

FOR DRY APPLICATION: Shake the contents of this can evenly over 8 square metres. Thoroughly water treated area after application.

FOR SPRAY APPLICATION: Dissolve the contents of this can in 4 to 8 litres of water and spray evenly over 8 square metres. Thoroughly wet all foliage. Wash watering can or sprayer thoroughly after use.

TOUGH PERENNIAL WEEDS: May be treated effectively when mature or dormant in the fall or in the spring under moderate rainfall conditions. Use in the summer only when rainfall or watering is sufficient to leach weed killer down to root zone. Apply either dry or as spray, 500 grams per 4 square metres.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. May cause irritation of eyes, nose, throat and skin. Avoid breathing dust or spray mist. Avoid contact with skin, eyes and clothing. Wash after use. Avoid contamination of feed, foodstuffs and bodies of water. Do not use on or near lawns, trees, shrubs, crops or other desirable plants or the soil over roots of desirable plants. Do not use on slopes where run-off may injure lawns or desirable plants. Keep children and animals off treated area until well watered and completely dry.

Store in a cool dry place, not in contact with ground or concrete floors.

Dispose of empty container with regular garbage. Do not re-use.
