DISPOSAL

Rinse the empty container thoroughly and add the rinsings to the spray mixture in the tank. Follow provincial instructions for any required additional cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of container in accordance with provincial requirements. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the regional office of Environmental Protection, Environment Canada.

NOTICE TO USER

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

DIRECTIONS FOR USE

TO CONTROL GRASSHOPPERS For the control of grasshoppers on pasture, forage, cereal crops and waste areas.

GRASSHOPPERS (nymphs): Apply 525 to 700 mL (200 to 275 g active ingredient per hectare) of HOPPER-SPRAY per hectare in sufficient water to give coverage. Do not graze or feed treated forage to dairy cattle within 48 hours.

GRASSHOPPERS (adult or winged): Apply one litre (425 g active ingredient per hectare) of HOPPER-SPRAY per hectare in sufficient water to give coverage. Do not graze or feed treated forage within 7 days of last application. Repeat applications as necessary. Remove cattle from grazing land before spraying. Do not apply to cereals with 21 days of harvest. Do not treat when alfalfa, red clover or sweet clover is in bloom.
FOR USE IN SASKATCHEWAN

Apply all rates of HOPPER-SPRAY with at least 45 L of water per hectare from ground equipment and with at least 11 L of water per hectare from aircraft.

NOTICE TO BUYER

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
