#### Net Contents 1.816 kg (4 lbs.)

Manufactured for: FARNAM COMPANIES, INC. 301 West Osborn Road Phoenix, AZ 85013 USA Distributed by: Farnam (Canada) Marketing, Inc.

### KEEP OUT OF REACH OF CHILDREN READ THE LABEL BEFORE USING

**PRECAUTIONS:** KEEP OUT OF THE REACH OF CHILDREN, domestic animals, pets and wildlife. Keep away from feed or foodstuffs. Harmful or fatal if swallowed or absorbed through the skin. Do not get in eyes, on skin or on clothing. Wash arms, hands and face with soap and water after handling and before eating or smoking. This material may reduce the clotting ability of the blood and cause bleeding. Keep out of lakes, streams and ponds.

**FIRST AID:** Do not get in eyes. In case of eye contact, flush eyes with water for 15 minutes. If swallowed, induce vomiting by giving one or two glasses of water and touching back of throat with finger or blunt object. Do not give anything by mouth to an unconscious person. If on skin, wash with soap and water. Contact a physician or call a poison control centre immediately. Take container, label or product name and Pest Control Products Registration Number with you when seeking medical attention.

**TOXICOLOGICAL INFORMATION:** Vitamin K1 in the form of intravenous, intramuscular or subcutaneous injections or by oral ingestion are suggested remedial treatments for anticoagulant poisoning. The severity of the case, measured by establishing prolonged prothrombin times (P.T.), will determine appropriate therapy. Monitoring P.T. will indicate the necessity of repeated treatments.

**DISPOSAL:** Do not reuse empty container. Dispose of the empty container by placing in household garbage.

RODENT DISPOSAL: Dispose of dead rodents in garbage or by burying.

**DIRECTIONS FOR USE:** SELECTION OF TREATMENT AREA: Place bait in locations where rats and mice travel and will most likely find and consume the bait. Placement along walls, in corners, by gnawed openings, in and around burrows, and in concealed locations where rats and mice feed is desirable. Maintain a steady supply of fresh bait; remove any spoiled or contaminated bait promptly.

Treated baits must be placed in locations not accessible to children, pets, wildlife, domestic animals; or in a tamper-resistant bait station.

**APPLICATION DIRECTIONS:** For Norway Rats (Rattus Norvegicus): Norway rats usually inhabit the ground floor of structures and burrow into the ground. They will range approximately 15 to 100 metres from their nesting area seeking food and water. Eliminate as much of the naturally occurring food as possible and place 3 to 16 pieces of Nibblers (usually at intervals of 5 to 10 metres) per placement. Maintain an uninterrupted supply of fresh bait for 10 days or until signs of rat activity cease.

Mice: Place 1 piece of JUST ONE BITE NIBBLERS<sup>™</sup> MINI BAIT BLOCKS at intervals of 2 to 4 metres per placement. Two pieces may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for 15 days or until signs of mouse activity cease. Replace contaminated or spoiled bait immediately. To prevent reinfestation, eliminate food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.
