BIO-LAB CANADA INC. 1005 Copperstone Drive Pickering, ON L1W 4A5 Weight per **BioGuard® Power Sticks™** tablet: 200 g

Power Sticks are made with a patent-pending formulation that clarifies as it sanitizes.

WARNING: Direct tablet contact may cause bleaching of vinyl or painted pool surfaces. Automatic feeding devices employing these tables must be totally free from traces of other pool sanitizers to avoid the probability of an explosion.

DIRECTIONS FOR USE:

1. Maintain recommended daily levels as determined by testing kit:

Free available chlorine: 1.0-3.0 ppm

pH: 7.2-7.8

Total Alkalinity: 100-120 ppm

Calcium Hardness: 200-300 ppm

- 2. For outdoor pools, chlorine residuals can be protected from destruction by the sun's rays by adding 300 g of stabilizer (cyanuric acid) per 10,000 L of pool water to yield the required initial concentration of 30 ppm.
- 3. If using an automatic chlorinator, fill the chamber(s) with **Power Sticks** and adjust the flow rate, according to manufacturer's recommendations, to maintain proper chlorine residual. Adding **Power Sticks** to the pool's skimmer basket is an alternative chlorine feed method. Daily usage should be approximately 25 g of **Power Sticks** per 10,000 L of pool water.

NOTE: Hot weather, heavy pool usage and rain may require higher usage rates to maintain proper chlorine residuals. Use a test kit regularly.

- 4. Periodic superchlorination of pool water is recommended. Follow label directions of superchlorination product being employed.
- 5. **Power Sticks** contains stabilizer which can accumulate in pool water. Keep stabilizer level within the range of 30 100 ppm by dilution with fresh water.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Avoid contact with skin and eyes. It is recommended to wear rubber gloves when handling this product. Harmful if swallowed. Keep container closed and store in a cool, dry location.

FIRST AID: If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, drink one glass of milk or water. Call a physician or Poison Control Centre IMMEDIATELY. Take container, label or product name and Pest Control Product Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: Treat symptomatically.

DISPOSAL: Do not re-use empty container. Wrap and dispose of empty container with household garbage. For information on the disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency. Contact the manufacturer and the provincial regulatory agency in case of a spill, and for clean-up of spills.
