MISSISSAUGA, ONT.

L4T 1G2

DIRECTIONS:

Skeeter Bombs are designed so they will "pop", rupture, dissolve or disintegrate when thrown in water. Once action starts, the especially formulated solution can be seen "shooting" across the surface of the water in all directions. This surface action will continue until the surface is completely covered, thus lowering the surface tension of the water. Surface action then becomes increasingly slower, resulting in an unused amount of material.

In small pools, artificial containers, etc. only a few seconds are required for effective coverage. If the water is cool (20 deg C or lower) the initial discharge of the solution will require from 5 to 40 minutes. Each Skeeter Bomb should larvicide 10 square metres of open and unobstructed water surface with a depth of about 15 cm. Proportionately more capsules should be used for larger areas and greater depth. Allowance has been made for Skeeter Bombs retaining, at times, a portion of the solution. In many cases this is advantageous, since it provides for additional "continuing action".

Use of this product for larviciding in bodies of water is limited to water wholly contained within the property of the user, and where there is no outflow beyond the property limits.

PRECAUTIONS:

Keep Skeeter Bombs dry. Combustible mixture. Do not store under excessive conditions of heat or humidity, or in direct sunlight. Keep away from open flame. Do not store above room temperature. Avoid contamination of feed or foodstuffs. Keep out of reach of children. Do not ingest.

FIRST AID:

DANGER: This control product contains petroleum distillates. If ingested do not induce vomiting. If patient is unconscious give him air. Contact a physician immediately.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.

NON-WARRANTY:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

NOTICE:

Use entire contents of can after opening. Keep can closed until ready to use to ensure proper and rapid rupturing.
