IN CASE OF SPILLS, POISONING OR FIRE TELEPHONE EMERGENCY RESPONSE NUMBER COLLECT (416) 634-2359 (24 HOURS A DAY)

ABC OIL is a light mineral oil, specially blended for use with atrazine formulations in oil-water emulsions for post emergence weed control applications in corn.

DIRECTIONS GENERAL INFORMATION: The post emergence activity of atrazine may be increased, especially on quack grass, nut grass and the annual grasses, green foxtail, barnyard grass, yellow foxtail, and the period of application for broad-leafed weeds extended by application in an oil-water emulsion. With this combination, satisfactory control has been obtained on seedling broad-leafed weeds up to l0cm high. Annual grasses should be treated when in the 1 to 2 leaf stage (not over 2.5 cm high). Combination of atrazine in oil-water emulsion has been particularly useful following periods of hot, dry weather, when weeds are tougher and more difficult to kill.

AMOUNT OF ABC OIL: Use 17 litres of ABC OIL in 220-300 litres of spray solution per hectare. Refer to atrazine label for appropriate rates of atrazine.

PROCEDURE FOR MIXING ABC OIL AND ATRAZINE: First, fill the spray tank with water allowing space for subsequent addition of atrazine and oil. Engage agitation system and pour in premixed slurry of atrazine in water. ADD ABC OIL LAST.

PRECAUTIONS: Avoid violent agitation of the materials in sprayer tank; excessive agitation may produce an invert emulsion (sludging out or buttering out) causing coagulation and settling of suspended materials. To prevent a buildup of oil in the sprayer, empty the tank as completely as possible before refilling. If any spray mixture remains in the tank, keep the agitation system in operation to avoid a separation of the oil from the water. After any break in the spray operation, agitate thoroughly. If an oil layer starts to build up in the tank drain the tank and cleanout with a strong detergent solution or solvent. Clean the sprayer thoroughly, immediately after use, by flushing the system with water containing detergent.

Some injury to corn can occur with atrazine applied in oil-water emulsions, especially during cold, backward weather; however, injury may also occur under other conditions or stress such as hot, dry weather. Do not add hormone-type weedkillers such as 2,4-D, 2,4-DB, MCPA, MCPB and dicamba or other herbicides to combinations of oil-water emulsions and atrazine. The risk of damage to other vegetation from spray drift is increased with the use of atrazine in an oil-water emulsion.

CAUTION:

KEEP OUT OF REACH OF CHILDREN. HANDLE AND APPLY ONLY AS RECOMMENDED AND AT RECOMMENDED RATES. DO NOT APPLY OR ALLOW TO DRIFT TO AREAS OCCUPIED BY PLANTS, OTHER THAN THOSE BEING SPRAYED BY UNPROTECTED HUMANS OR BENEFICIAL ANIMALS.

FIRST AID:

CONTAINS PETROLEUM DISTILLATES. DO NOT INDUCE VOMITING. IF

SWALLOWED, DO NOT INDUCE VOMITING. CONTACT PHYSICIAN IMMEDIATELY. IF IN EYES, FLUSH WITH WATER FOR 15 MINUTES. GET MEDICAL ATTENTION. IF ON SKIN, REMOVE CONTAMINATED CLOTHING, THEN WASH THE EXPOSED SKIN WITH SOAP AND WATER.

NOTICE TO USER:

This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
