AQUANAUT 12
CHLORINATING LIQUID
for Crystal Clear POOL WATER

Disinfects & Purifies SWIMMING POOL WATER

DOMESTIC

READ THE LABEL BEFORE USING

CONTROLS ALGAE

WARNING

CORROSIVE -DANGEROUS GAS FORMED WHEN MIXED WITH ACID

GUARANTEE (WHEN PACKED)
Sodium Hypochlorite 10.8%
Available Chlorine Content 10.3%

REGISTRATION NUMBER 17964
PEST CONTROL PRODUCTS ACT

DO NOT STORE IN TRUNK OF CAR FOR EXTENDED PERIOD

10 Litre

20 Litre

Aquanaut 12 is a high strength sodium hypochlorite solution which exhibits excellent algaecidal properties. Proper use of Aquanaut 12 in conjunction with a regular maintenance program will give a sanitary pool, free of harmful micro-organisms.

DIRECTIONS

1. Maintain recommended daily levels as determined by testing kit:

Free Available Chlorine	1.0 - 3.0 ppm
pH	7.2 - 7.8
Total Alkalinity	100 - 120 ppm
Calcium Hardness	200 - 300 ppm
2. Superchlorinate pool water initially with 1 litre Aquanaut 12 per 10,000 Litres of pool water. For best results superchlorinate at dusk.
3. Chlorinate daily to maintain proper chlorine residual with 250 millilitres of Aquanaut 12 per 10,000 litres of pool water, or as needed. NOTE: Hot weather, heavy pool usage, and rain may require higher dosage rates to maintain proper chlorine residuals.

4. Superchlorinate weekly with 1 litre per 10,000 litres when average daily temperature is 25 'C - 32'C. Otherwise, superchlorinate every other week.
5. For visible algae, superchlorinate with 2 litres per 10,000 litres of pool water. Heavy algae infestation may require dosages up to 3L per 10,000L. Wait at least 24 hours and vacuum pool when dead algae settles.
6. For wading pools, chlorinate daily to maintain chlorine residual of 3-5 ppm by adding 45mL per 1,000L of pool water, or as needed.

NOTE: For outdoor pools, chlorine residuals can be protected from destruction by sun's rays by addition of cyanuric acid (stabilizer).

PRECAUTIONS:

Keep out of reach of children
Dangerous gas formed when mixed with acid
Do not mix with any other chemical
Avoid contact with skin and eyes
Harmful if swallowed
Keep container closed and store in a cool location
Rinse container thoroughly before discarding
To dispose of chemical, flush into sewer with large quantities of water.

FIRST AID TREATMENT: If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed drink one or two glasses of milk or warm water. Call Physician immediately. Keep patient warm.
