Laval, (Quebec)
H7P 2P4

#### TREVI BROME BROMINATING TABLETS

Weight per Tablet 20g

TREVI BROME Brominating Tablets when used as directed, are effective as a swimming pool water sanitizer and disinfectant.

#### WARNING:

Direct tablet contact may cause bleaching of vinyl or painted pool surfaces.

Automatic feeding devices employing these tablets must be totally free from traces of other pool sanitizers to avoid the probability of an explosion.

## DIRECTIONS FOR USE:

 Maintain recommended daily levels as determined by testing kits.

Free available bromine: 1.0 - 3.0 pH: 7.2 - 7.8

Total Alkalinity: 100 - 150 ppm Calcium Hardness: 200 - 300 ppm

2. If using in automatic feeding device, fill the chamber(s) with tablets and adjust flow rate, according to manufacturer's recommendations, to maintain proper bromine residual. Adding tablets to the pool's skimmer basket is an alternative bromine method. Daily usage should approximate 25 g of TREVI BROME Brominating Tablets per 10,000 L of pool water.

NOTE: Hot weather, heavy pool usage, and rain may require higher usage rates to maintain proper bromine residuals.

3. Periodic superchlorination of pool water is recommended. Follow label instructions of superchlorination product being employed.

## PRECAUTIONS:

Keep out of reach of children. Dangerous gas formed when mixed with acid. Do not mix with any other chemical. Strong oxidizing agent. May cause fire or explosion if contaminated. Avoid contact with skin and eyes. Avoid breathing dust. Harmful if swallowed. Keep container closed and store in a cool, dry location. Rinse container thoroughly before discarding. Do not reuse. For information on the disposal of unused, unwanted product and on the cleanup of spills, contact the Provincial Regulatory Agency or the Manufacturer.

#### FIRST AID:

If splashed in eyes or on skin, flush thoroughly with water for 15 minutes. For eye contact, get medical attention. If swallowed, drink one glass of milk or water. Call a physician or Poison Control Centre IMMEDIATELY.
