Contains 12 tubes each containing 12 tablets;

each tablet 28 grams

CASTROL CANADA INC.
INDUSTRIAL PRODUCTS DIVISION
3660 LAKESHORE BLVD. WEST,
TORONTO, ONTARIO M8V 3S4

PRECAUTIONS: HARMFUL IF SWALLOWED - Conditioner 102 Tablets decompose in the presence of alkaline materials. Protect them from vapours of ammonia and amines during handling and storage to prevent deterioration and release of formaldehyde.

FIRST AID: If swallowed, immediately induce vomiting by giving 2 glasses of water and sticking finger down throat. Never give anything by mouth to an unconscious person.

DIRECTIONS FOR USE: To provide fast relief from the rancidity which can occur in metalworking fluids, add 1 tablet for each 100 litres of solution to the machine reservoir once a week, preferably on Friday afternoon or before the machine will be idle for some time. For extremely fouled systems, add 2 tablets weekly per 100 litres. Allow fluid to circulate for at least 1 hour after addition.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information. This service and this information do not replace the official hard-copy label.
