ROZ-TOX Wood Preservative & Sealer is a clear, penetrating, ready to use sealer. It extends the life of wood, not in ground contact and protects the wood from moisture and water. It penetrates and seals the surface in preparation for the final finishing coat of paint, varnish or urethane. It also protects against grain raising and darkening or bleaching of wood surfaces and resists acids, alkalies and salt sprays.

DUST FREE: 15 minutes TACK FREE: 1/2 hour HARD DRY: Up to 2 hours.

DIRECTIONS FOR USE:

For exterior use only. For above ground applications. Surface to be treated should be dry and clean. Remove all paint, varnish or wax or any other coating that may prevent penetration. Surface may be dipped or brushed. Use as much preservative as

needed. One coat is usually sufficient, but in some cases two coats may be necessary. DANGER: Keep away from open flame or spark. Use only under well-ventilated conditions. Avoid breathing of vapour and contact with skin. Do not use in locations where food is stored or processed or on wood used in flower, fruit or vegetable gardens. Keep container closed when not in use. Do not use on recreational tables or children's playground structures.

TOXICOLOGY: Contains petroleum distillates and zinc naphthenate.

FIRST AID:

If swallowed, do not induce vomiting. If splashed in eyes or on skin, flush thoroughly with water. Call physician immediately. If patient is unconscious, give him air.
