RETAIN POUCH CARTON FOR USE AND DISPOSAL DIRECTIONS

Used as directed, Bovaid Ear Tags will provide season-long control of HORN FLIES and will reduce populations of FACE FLIES. Significant gains in weight and milk yield can be achieved with Bovaid. Adequate control of face flies may reduce pink eye infections.

RESISTANCE MANAGEMENT: The effectiveness of Bovaid Ear Tags on pyrethroid resistant horn fly populations may decrease after a short time of use. The use of this product should conform to current resistance management strategies. For the latest information on horn fly populations and their control strategies in your area, please consult with local Provincial authorities or your Vétérinaire representative.

DIRECTIONS FOR USE:

- a) Wear chemical-resistant gloves during product use.
- b) For maximum benefit, apply early each spring before flies emerge. Delaying applications until fly populations have built up may result in some loss of control.
- c) The entire herd must be tagged to control flies as claimed.
- d) Rate to use: Horn Flies: tag 1 ear
Face Flies: tag both ears
- e) Remove tags at the end of the season and before slaughter.
- f) Dip pliers with stud into a disinfectant before tagging of each animal.

APPLICATION PROCEDURE: Bovaid Ear Tags can be conveniently applied with the ALLFLEX TAGGING SYSTEM™. Assemble unit and position tag on the firm flat surface in the centre of the ear between the ribs. Make sure the shaft of the male tag does not penetrate a rib or blood vessel.

PRECAUTIONS: KEEP OUT OF THE REACH OF CHILDREN. Avoid contact with eyes, skin or mouth. Wear chemical-resistant gloves during application and wash hands thoroughly after tagging is completed. Store unused tags in original carton away from heat.

FIRST AID: If skin irritation occurs, wash immediately with soap and water. If eye irritation occurs, flush eyes thoroughly with water. If swallowed, do not induce vomiting. Contact physician or poison control centre IMMEDIATELY. Take container, label or product name and PCP Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: The treatment should be primarily symptomatic and supportive.

DISPOSAL: The insecticide in Bovaid Ear Tags is highly toxic to fish. Dispose of pouch and used tags according to municipal and provincial regulations. Do not dispose of used tags near a source of water. For information on the disposal of unused or unwanted product, contact the manufacturer or the Provincial regulatory agency.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the *PEST CONTROL PRODUCTS ACT* to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
