Mississauga, Ontario
L4Z 2Z1

DIRECTIONS FOR USE:

To prevent your pet, or stray animals from soiling flower beds, areas of lawn, trees, shrubbery or evergreens: Apply granules by hand or with a fertilizer spreader to borders of flower beds; or to ground and grass around the base of shrubs, trees and evergreens or to patches of lawn you wish to protect. Sprinkle enough to cover the treated area lightly (about 1 kg per 50 m²). Repeat applica- tions until the undesirable animal habits are

broken. Repeat applications after rains.

Effectiveness may be reduced under cool weather conditions when less evaporation takes place from the granules (less than 18°C).

To protect garbage cans and rubbish containers from disturbance by dogs and cats, sprinkle the ground or floor about them liberally with granules. Repeat as necessary.

Stray animals are frequently attracted to areas where urine or feces have been deposited. First, remove any droppings, then apply these granules. Do not apply granules directly to foliage of shrubs or to ornamental soft-bodied plants. Do not apply on or near food crops.

General: The most effective control for a pet is the sharply-spoken word backed up with disciplinary action. For most effective results on pets, this repellent should be used in conjunction with training.

PRECAUTIONS:

KEEP OUT OF REACH OF CHILDREN. Avoid contamination of feed and foodstuffs. Use gloves if applying by hand. Avoid contact with skin. Wash hands with soap and water after applying granules.

FIRST AID INSTRUCTIONS:

If swallowed, induce vomiting. Call a doctor.

DISPOSAL:

Do not reuse container. Dispose of empty container with household garbage.
