SA-700 is used to control algae, bacteria and fungi in recirculating commercial and industrial water cooling towers.

SA-700 IS EFFECTIVE AT BOTH ALKALINE AND ACID ph VALUES AND WILL NOT CAUSE FOAM.

DIRECTIONS FOR USE

Prior to the use of SA-700 in water cooling towers, systems should be cleaned to remove algal growth, micro-biological

slime, and other deposits. Then make an initial slug addition of 0.5 to 1.0 litres of SA-700 per 10,000 litres of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 0.15 to 1.0 litres of SA-700 per 10,000 litres of water every 2 to 5 days or as needed. The frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

PRECAUTIONS  
KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid breathing vapours. Avoid contact with skin, eyes, or clothing.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not contaminate water, food, or feed by storage or disposal. Do not reuse empty container.

FIRST AID: If splashed in eyes or on skin, flush thoroughly with water. If eye irritation persists, seek medical attention. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available, drink large quantities of water.

NOTICE TO USER:

This control product is to be used only in accordance with the directions of this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
