Cross-contamination is of major housekeeping concern not only in hospitals, but in schools, institutions, and industry. G-1085

has been formulated to aid in the reduction of cross-contamination in these areas. G-1085 is a one-step disinfectant-cleaner that is effective against a broad spectrum of bacteria, is virucidal, fungicidal and will prevent the growth of mold and mildew and their odors when used as directed. G-1085 is an effective one-step sanitizer-cleaner for use on non-food contact surfaces.

When used as directed, G-1085 will deodorize surfaces in toilet areas, behind and under sinks and counters, garbage cans and garbage storage areas and other places where bacterial growth can cause malodors.

PRECAUTIONARY STATEMENTS:

KEEP OUT OF REACH OF CHILDREN. DANGER: CORROSIVE TO EYES. DO NOT GET IN EYES, ON SKIN OR ON CLOTHING. HARMFUL IF SWALLOWED. AVOID CONTAMINATION OF FOOD.

FIRST AID: In case of contact, immediately flush eyes or skin with plenty of water for at least 15 minutes. For eyes, call a physician. Remove and wash contaminated clothing before reuse. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Avoid alcohol. Call a physician immediately.

TOXICOLOGICAL INFORMATION: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock, respiratory depression and convulsion may be needed.

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal or reconditioning.
3. Dispose of the container in accordance with provincial requirements.
4. For information on the disposal of unused, unwanted product and the cleanup of spills contact the regional office of Environment Canada.
5. For small spills. Recover free liquid. Soak up residue with solids absorbent. DO NOT FLUSH INTO SURFACE STREAMS. INFORM ENVIRONMENT CANADA AS IN #4.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

DIRECTIONS FOR USE: G-1085 is a proven "one-step" disinfectant-

cleaner-sanitizer-fungicide-mildewstat-virucide which is effective in water up to 400 ppm hardness in the presence of 5% serum contamination. Apply G-1085 to walls, floors and other hard (inanimate) non-porous surfaces such as tables, chairs, countertops, sinks, tile, porcelain, and bedframes with a cloth, or mop so as to thoroughly wet surfaces. For heavily soiled areas, a preliminary cleaning is required. Prepare a fresh solution daily or when use solution becomes visibly dirty.

DISINFECTION: To disinfect hard, non-porous surfaces, add 8 mL/L of water. Treated surfaces must remain wet for 10 minutes. At this use level, G-1085 is also virucidal and fungicidal.

SANITIZING: To sanitize non-porous, non-food contact surfaces, add 1.5 mL/L of water. Treated surfaces must remain wet for 60 seconds.

8 mL/L Use-Level: The broad spectrum activity of G-1085 evaluated and found to be effective against the following organisms by the AOAC Use-Dilution test: *Pseudomonas aeruginosa*; *Staphylococcus aureus*; *Salmonella choleraesuis*; *Escherichia coli*; *Streptococcus pyogenes*; *Klebsiella pneumoniae*; *Enterobacter aerogenes*; *Salmonella schottmuelleri*; *Streptococcus faecalis*; *Shigella dysenteriae*; *Brevibacterium ammonigenes* and *Salmonella typhi*.

AOAC Fungicidal Test: G-1085 is an effective fungicide against *Trichophyton menagrophytes* (the athlete's foot fungus) when used on surfaces in areas such as locker rooms, dressing rooms, shower and bath areas, exercise facilities, etc.

Mold and Mildew Control: At 8 mL/L, G-1085 will effectively inhibit the growth of mold and mildew and the odors caused by them when applied to hard, non-porous surfaces (as indicated in general cleaning instructions above). Allow to dry on surface and repeat when mildew growth returns.

Virucidal Performance: At 8 mL/L use-level, G-1085 was evaluated and found to be effective against the influenza A/Brazil Virus on inanimate environmental surfaces.

Sanitizing: Non-Food Contact Surfaces (such as floors, walls, tables, etc.); at 1.5 mL/L use-level. G-1085 is an effective sanitizer against *Staphylococcus aureus* and *Klebsiella pneumoniae* on hard non-porous environmental surfaces.

Instructions for Cleaning and Decontaminating Against HIV-1, on Surfaces and Objects Soiled with Blood or Bodily Fluids: This product is effective against HIV-1 (Human Immunodeficiency Virus) hard water up to 400 ppm (CaCO₃), and in the presence of organic soil (5% blood serum).

Personal Protection: When handling items soiled with blood or bodily fluids, wear disposable latex gloves, gowns, masks, and

eye coverings.

Cleaning Procedure: Thoroughly clean blood or bodily fluids from surfaces before applying G-1085.

Contact Time: To kill HIV-1, apply G-1085 at 32 mL for 4 Litres of water and allow surface to remain wet for 10 minutes.

Disposal of Infectious Materials: Blood, body fluids, cleaning materials and clothing should be autoclaved and disposed of according to provincial and local regulations for infectious waste disposal.
