Made and printed in U.S.A. (C) 1995

BIRD PROOF(R) is a transparent, sticky compound which, when applied to ledges and sills, will discourage birds from roosting or returning to these covered areas. This product remains tacky at -10'C and will not run up to 94'C. Where infestation is severe, heavy bird traffic may flatten repellent. In these instances, make a second application immediately. Repellent can be removed with naptha or powder type cleaning agent.

PRECAUTIONARY STATEMENTS ENVIRONMENTAL HAZARD

DO NOT APPLY TO SURFACES WHERE PROTECTED BIRD SPECIES MAY BECOME ENTRAPPED BY THIS TACKY REPELLENT.

Use only in conformity with Federal Migratory Bird Treaty Acts regulations.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal.

PESTICIDE DISPOSAL: For information on the disposal of unused, unwanted product and the cleanup of spills, contact the regional office of Conservation and Protection, Environment Canada.

CONTAINER DISPOSAL: Do not reuse empty container. Wrap container and discard with regular garbage.

DIRECTIONS FOR USE

NOTICE TO USER. This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

Surface must be clean and dry to assure adhesion of repellent! Clean by wiping or scraping all dust, dirt, loose paint, droppings etc. On porous surfaces such as stone or unpainted wood, surface must be sealed by brushing on one coat of shellac or a 50% solution of white glue. After coating has dried, apply repellent with a caulking gun or putty knife. Properly applied bead looks like this (diagram). Ledges or Sills ... apply about 2.5 cm in from edge in strips 1 cm in diameter. Press against sill to get good adhesion and leave occasional gaps for rain water to drain. Roofs, peaks, cornices, etc... apply 1 cm diameter bead along highest point. Press against surface to insure good adhesion. When applied in 1 cm x 1 cm bead will cover 4 meters. DO NOT APPLY LARGER DIAMETER BEADS OF REPELLENT.

FIRST AID: Harmful if swallowed. Avoid contact with skin, eyes or clothing. In case of contact, immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists.
