BRANCHES THROUGHOUT NORTH AMERICA

GENERAL INFORMATION: Tacky-Toes Bird Repellent is a soft, sticky material. It remains tacky all year round and will repel birds for periods exceeding a year under average conditions. Use on roof, window sills, chimneys, cornices and peaks of farm buildings, office buildings and residential buildings.

DIRECTIONS: Apply Tacky-Toes to clean, dry, horizontal surfaces where birds roost. Ensure that surfaces are clean and dry by wiping or scraping off all dust, dirt, loose paint, droppings, etc. Apply a strip approximately 1 cm wide and 1 cm thick about 1.5 cm from the outer edge, or along highest point. On wide areas 2 or more such strips spaced at 10 cm apart may be required. If prompt removal is anticipated, applications may be made over waterproof masking tape. Solvents such as carbon tet or mineral spirits may be used for cleaning hands and tools. Dispose of empty container in garbage.

KEEP OUT OF REACH OF CHILDREN

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

This label transcript service is offered by the Pest Management Regulatory Agency to provide efficient searching for label information.
