NOTICE TO USER:

This control product is to be used only in accordance with the

directions on this label. It is an offence under the PEST CONTROL PRODUCTS ACT to use a control product under unsafe conditions.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

FIRST AID:

This product contains petroleum distillate. If ingested do not induce vomiting. If patient is unconscious, give him air. Keep patient prone and quiet. Transport the patient immediately to the nearest physician.

Skin Contact: If spilled on the skin, remove all contaminated clothing at once. Thoroughly wash skin with soap and water. Contact physician. Wash contaminated clothing before reuse.

For Eyes: If the material gets into the eyes, flush immediately with running water for at least 15 minutes. Contact physician. CAUTION: KEEP OUT OF REACH OF CHILDREN. Product is harmful if swallowed. Avoid contact of this product with eyes. When handling, the use of safety goggles is recommended. Avoid inhalation of vapours. Keep product in original closed container and store away from food and feed. Wash hands and exposed skin before eating, drinking, smoking and after work. Flush concentrate from skin and eyes with water immediately after contact.

DECONTAMINATION AND DISPOSAL:

- 1. Rinse the emptied container thoroughly and add the rinsings to the spray mixture in the tank.
- 2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal.
- 3. Make the empty container unsuitable for further use.
- 4. Dispose of the container in accordance with provincial requirements.

- 5. For information on the disposal of unused, unwanted product, and the cleanup of spills, contact the regional office of Conservation and Protection, Environment Canada.

GENERAL INFORMATION:

MATAVEN is a post-emergent herbicide for the control of wild oats

in licensed varieties of wheat (spring, durum, winter), triticale, canary grass, sunflowers and certain forage crops (seed production only).

TIMING OF APPLICATION:

MATAVEN can be applied to wild oats from the 3-leaf stage to the 6-leaf stage. For optimum control and maximum yield response, apply Mataven when the majority of the wild oats have 3-4 leaves.

TIME AND RATE OF APPLICATION:

CROP	CROP STAGE	LITRES MATAVEN PER HECTARE	REMARKS	
Wheat (provincially recommended varieties of spring, durum, winter), Canary grass, Triticale	Not beyond 6-leaf stage	5.0		
Sunflowers	Not beyond 6-leaf stage, but before dense crop canopy forms	5.0 - 6.5	Use the higher rate when wild oat pressure is heavy and for band application over crop row. Band application should be combined with interow cultivation.	
FORAGE CROPS FOR SEED PRODUCTION ONLY				
CROP	CROP STAGE	LITRES MATAVEN PER HECTARE	REMARKS	

Alfalfa, Red Clover, Birdsfoot trefoil Sainfoin, Cicer milk vetch	In year of seeding	5.0	Do not harvest or graze forages in year of treatment.
Bromegrass Meadow Fescue, Creeping Red Fescue Russian Wild Ryegrass, Intermediate Wheatgrass, Crested Wheatgrass	In year of seeding	5.0 - 7.5	Use the high rate when grown without a companion crop. Use the low rate when grown with a companion crop for which Mataven is registered. Do not harvest for forage or graze in year of treatment.

MATAVEN PLUS GLEAN ** TANK MIX (WHEAT ONLY):

Apply Mataven at 5 litres per hectare tank mixed with Glean at 15 to 30 grams per hectare for the control of wild oats and broadleaf weeds in spring and durum wheat. For optimum control, apply this tank mixture when the wild oats are in the 3-4 leaf stage (majority in the 4-leaf stage).

DO NOT ADD SURFACTANTS OR OTHER ADDITIVES TO THIS TANK MIX. CONSULT THE GLEAN LABEL FOR DETAILED INFORMATION AND SPECIAL RESTRICTIONS.

MIXING INSTRUCTIONS:

- 1. Fill the sprayer tank ½ full with water. Engage gentle agitation.
- 2. Add Glean (if applicable) and ensure it is completely suspended in the water. Be certain Glean is fully mixed before adding Mataven.

- 3. Complete filling the sprayer tank 9/10 full and add the Mataven.
- 4. Finish filling spray tank and maintain gentle agitation during mixing and spraying.
- 5. Do not let contents stand without agitation system engaged.

APPLICATION INSTRUCTIONS:

Ground Application: Apply Mataven in a minimum of 100 litres of water per hectare, using flat fan spray tips at a minimum pressure of 300 kPa. Use 50 mesh or larger in-line and nozzle screens. If crop or weed canopy is dense, increase water volume to improve coverage and weed control.

Aerial Application: Apply Mataven by air with not less than 15 litres per hectare of water. Do not spray in winds greater than 15 km/hr. Do not allow spray drift to contaminate other crops. Application should not be made by air when oat crops are adjacent and downwind of the treated area. Do not apply Mataven plus Glean by air.

USE PRECAUTIONS:

- . Do not tank mix with any herbicide other than Glean.
- . Allow 4 days between an MCPA or bromoxynil application and an application of Mataven.
- . Allow 7 days between a 2,4-D or dicamba application and an application of Mataven.
- . Rainfall within 2 hours of application may reduce effectiveness of Mataven.
- . Protect Mataven from freezing.
- * Registered trademark of Shell Canada Limited DuPont Canada Inc. is the registered user
- ** Glean is a registered trademark of E.I. DuPont de Nemours and Company
