READ THE LABEL BEFORE USING

CHEMAGRO LIMITED
1355 AEROWOOD DRIVE
MISSISSAUGA, ONTARIO, CANADA L4W 1C2

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the PEST CONTROL PRODUCTS ACT to use a control product under unsafe conditions.

DIRECTIONS FOR SPRAY OR PAINT APPLICATION:

BAYTEX 0.5% Ready-To-Use Insecticide should be applied undiluted as a spray or paint for residual control of cockroaches (waterbugs), ants, mosquitoes, flies, crickets and wasps which are a problem in and around the home and other buildings.

For use inside buildings, application should be made only as a

coarse spray or with a paint brush to baseboards, cracks, crevices, and other insect hiding places. Also apply to adjacent exposed surfaces where the insects will crawl when they come out of hiding. Heavy sprays may cause staining. Repeat as necessary to maintain effective control.

For exterior use, apply as a coarse spray or with a paint brush to selected surfaces such as doors, screens, window frames, door sills, and areas of porches or patios where these insects alight or congregate. Apply to the nest of wasps after dark when all of the insects have returned to the nest. Repeat as necessary to maintain effective control. Apply localized treatments to infestations of ants and fleas in outdoor areas where there is no vegetation. For ants, thoroughly wet hills and runways.

PRECAUTIONS

Do not apply as an indoor space spray.
Avoid excessive wetting of asphalt tile, rubber, and plastic materials.
Do not spray on plants.
Do not use in dairy barns, or poultry houses.
Remove fish and other pets from room before spraying.

CAUTION

Harmful if swallowed, inhaled, or absorbed through the skin. Do not get in eyes, on skin, or on clothing. Do not breathe spray mist. Wash thoroughly with soap and warm water after handling. Wash clothing with soap and hot water before reuse.

Avoid contamination of feed, food, or food-handling equipment. If food-handling equipment becomes contaminated, clean thoroughly before reuse. Keep out of reach of children.

Do not use, pour or store near heat or open flame.

FIRST AID: Contains petroleum distillates. If swallowed, do not induce vomiting. Call a physician immediately. If on skin, remove contaminated clothing and wash skin immediately with soap and warm water. If eyes are contaminated, wash immediately with flowing water for at least 15 minutes.

TOXICOLOGICAL INFORMATION: The compound inhibits cholinesterase resulting in stimulation of the central nervous system. This results in a sense of "tightness" in the chest, sweating,

contracted pupils, stomach pains, vomiting and diarrhea. The antidote is atropine sulfate administered in large therapeutic doses repeated as necessary to the point of tolerance. 2-PAM is also antidotal and may be administered in conjunction with atropine. Do not give morphine. Watch for pulmonary edema, which may develop in serious cases of poisoning even after 12 hours. At first sign of pulmonary edema, the patient should be placed in an oxygen tent and treated symptomatically.

NOTICE

Seller's guarantee shall be limited to the terms set out on the label and, subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.

BAYTEX is a Reg. TM of Bayer AG.
