AQUAGUARD 620 is used to control algae, bacteria, and fungi in recirculating commercial and industrial water cooling towers.

AQUAGUARD 620 is EFFECTIVE AT ALL pH VALUES AND, WILL NOT CAUSE FOAM.

DIRECTIONS FOR USE

Prior to the use of AQUAGUARD 620 in water cooling towers, systems should be cleaned to remove algal growth, microbiological slime, and other deposits. Then make an initial slug addition of 0.5 to 1.0 L of AQUAGUARD 620 per 10,000 litres of water in the system. Repeat initial dosage until control is evident. Make subsequent slug additions of 0.15 to 1.0 L of AQUAGUARD 620 per 10,000 litres of water every 2 to 5 days or as needed. The

frequency of addition depends upon the relative amount of bleedoff and the severity of the microbiological problem. Slug additions should be made in the sump of water cooling towers.

PRECAUTIONS
KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. Avoid breathing vapors. Avoid contact with skin, eyes or clothing.

ENVIRONMENTAL HAZARDS: This product is toxic to fish. Keep out of lakes, streams, or ponds. Do not contaminate water, food or feed by storage or disposal. Do not reuse empty container.

FIRST AID: If splashed in eyes or on skin, flush thoroughly with water. If eye irritation persists, seek medical attention. If swallowed, drink promptly a large quantity of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. Call a physician immediately.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

NOTICE TO BUYER: Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
