READ LABEL BEFORE USING

DOMESTIC 500 mL

WILSON LABORATORIES INC.  
DUNDAS ONTARIO L9H 3H3

DIRECTIONS FOR USE:

WHEN TO APPLY - Spray when first evidence of rabbit or deer  
feeding is noticed and when weather is clear and dry.

SPRAYING - Mix 50mL (approximately 3 tablespoonfuls) of Natural  
Animal Repellent per litre of water and apply with a compressed  
air tank sprayer or a hand operated trigger sprayer.

For Vegetables and Strawberries, apply a light cover spray. Do  
not apply to food crops within 14 days of harvest.

For Ornamentals and Nursery Stock, spray foliage and trunks  
thoroughly.

PAINTING - Mix equal volumes of Natural Animal Repellent and  
water and apply by brush to trunks to the maximum height rabbits  
may reach to prevent girdling.

For Fruit trees, Raspberries, Blueberries and Vines, apply to outside foliage and thoroughly to trunks.

Retreatment may be necessary after heavy or prolonged rainfall.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Avoid inhalation and direct contact. Wash after application. Do not apply to seedlings without first testing one or two plants and waiting two days for evidence of damage. Do not apply with any other additives or pesticides.

DISPOSAL: Discard empty container with household garbage.
