NET 20 LITRES
LITRES

12% AVAILABLE CHLORINE

WARNING CORROSIVE

DANGEROUS GAS FORMED
WHEN MIXED WITH ACID

For sanitary pool water, add LIQ-CHLOR daily to kill germs and control algae

DIRECTIONS

Before adding LIQ-CHLOR, the pH should be tested and adjusted to within 7.4 and 7.8. Add muriatic acid if pH is high. Add soda ash if pH is low. LIQ-CHLOR should be added daily to maintain 0.5 to 1.0 parts per million available chlorine. The use of a test kit is recommended, as the air temperature and the number of people in the pool will affect the amount of LIQ-CHLOR required.

Under average conditions, LIQ-CHLOR should be added daily to pool water according to the following chlorination guide.

Pool Capacity (Litres)	Daily LIQ-CHLOR \ Charge (Litres)
10,000	125 - 250 mL
20,000	250 - 500 mL
50,000	625 mL - 1.25 L
100,000	1.25 L - 2.50 L
250,000	3.25 L - 6.25 L

NOTE: FIRST APPLICATION SHOULD BE DOUBLE THE INDICATED AMOUNT

Every three weeks, add one week's charge of LIQ-CHLOR in one application to ensure proper control of algae, slime and fungus. Avoid using pool until chlorine residual drops below 2.0 p.p.m. (approximately 24 hours)

NOTICE TO USER: This control product is to be used only in accordance with the direction on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

CAUTION: Do not mix with a toilet bowl cleaner, rust remover, ammonia or acids. Avoid contact with skin and eyes.

FIRST AID TREATMENT: Contains Sodium Hypochlorite. If splashed in eyes or on skin, flush thoroughly with water. If swallowed give one or two glasses of milk or warm water. Call physician immediately. Keep patient warm.

Keep out of reach of children. Use only as directed. Keep tightly capped in upright position.
