## 3M MEC-GBM Sprayable Pheromone For Grape Berry Moth

This product is a timed-release, sprayable, microencapsulated pheromone concentrate used for mating disruption of the Grape Berry Moth, *Endopiza viteana* Clemens on grapes.

## AGRICULTURAL READ THE LABEL BEFORE USING

REGISTRATION NO.: 26517 PEST CONTROL PRODUCTS ACT

Net Contents: 900 mL 3M Canada, P.O. Box 5757, London, Ontario, N6A 4T1 519-451-2500

**DIRECTIONS FOR USE:** This product is an effective tool to help manage Grape Berry Moth populations in grapes. This product can reduce, or in some cases, prevent mating by interfering with the chemical communication system between males and females. Reduced mating results in a decrease in the number of eggs laid and lower larval populations thereby reducing the need for conventional insecticides. Supplemental insecticides may be required if initial populations in the treated areas are too high or if a major source of mated females is present adjacent to the treated area. Treated areas should be thoroughly monitored for the presence of other pests and treated if necessary.

SHAKE WELL BEFORE USING. Recommended rate of application is 75 mls product (15 g AI) per hectare [30 mls product (6 g AI) per acre] applied in sufficient water for uniform coverage. This product can be applied with conventional ground application equipment. This product should be applied just prior to the start of each adult flight period, with repeat applications at 2 to 3 week intervals during adult flights. Consult your local pest advisor on timing of flight periods. High temperatures may require more frequent applications. Monitoring with pheromone traps and routine inspection of foliage and fruit for the presence of larvae or larval damage is strongly recommended to determine the need and timing of repeat applications.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Not for use on humans. POTENTIAL SKIN SENSITIZER. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals. Irritating to skin and eyes. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Avoid breathing spray mist. During mixing, loading and application, personnel should wear chemical resistant gloves, long sleeved shirt, long pants and socks. In addition, goggles should be worn during mixing, loading clean-up or repair activities. Do not contaminate water by cleaning of equipment or disposal of wastes.

**FIRST AID:** If on skin, wash thoroughly with soap and water. If in eyes, flush with clean water. If inhaled, move subject to fresh air. Consult physician if irritation persists. In case of ingestion, dilute by giving two glasses of water to drink and promptly contact a poison control center or physician. Never give anything by mouth to an unconscious person. Remove contaminated clothing promptly and wash before re-use. Take the container, label or product name and PCP Registration Number when seeking medical attention

## **TOXICOLOGICAL INFORMATION:** Treat symptomatically. **DISPOSAL**.

Triple- or pressure-rinse the empty container. Add the rinsings to the spray mixture in the tank. Follow provincial instructions for any required additional cleaning of the container prior to its disposal. Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For information on the disposal of unused, unwanted product, contact the manufacturer or the provincial regulatory agency in case of a spill, and for clean-up of spills.

**STORAGE:** Store in original container above 0°C (32°F) to avoid freezing. Should freezing occur, thaw the product completely and mix thoroughly by agitation before use.

**NOTICE TO USER:** This control pest product is to be used only in accordance with the directions on label. It is an offense under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
