WEITECH

TRANSONIC 150

Ultrasonic Direct Plug-in Mouse Repeller  
with Night Light

How it works. The Transonic 150 emits intense sound waves which penetrates the nervous systems of mice and drives them away. Because of the intensity and complexity of the sounds, they usually will not be able to build up an immunity to them.

Mice

Transonic's patented electronics generate ultrasonic noises that drive pests to distraction.

It causes them to change their routines by upsetting their communication and social behavior - and forces them to leave!

How Mice Hear and How They Can Be Repelled

Transonic 150  
(Instruction for Canada)  
How Mice Hear and How They Can Be Repelled

Since the beginning of his existence, man has utilized sound to repel other living things in order to protect himself, his family and his environment.

In this age of high technology, with the invention of the transducer, we are now able to both detect and produce sounds that extend beyond the range of human hearing.

Ultrasonics or ultrasound - are terms used to describe sounds above the limits of human hearing, or above 20,000 Hz. Rodents have well developed auditory (hearing) systems.

ABOUT TRANSONIC 150

TRANSONIC 150 emits intense sound waves which penetrates the nervous systems of mice and drives them away. Because of the intensity and complexity of the sounds, they usually will not be able to build up an immunity to them.

TRANSONIC 150 will have a maximum range of about 93 square metres (1,000 square feet). However, ultrasonic sounds may be absorbed by soft materials such as upholstered furniture, draperies and carpets. Therefore, the more of these items, the less distance TRANSONIC 150 sounds will carry.

Power consumption is approximately 18 milliamps or about 15¢ to 25¢ per month when operated continuously, depending upon the cost of electricity in your area. (U.L. and C.U.L. listed)

#### DIRECTIONS

NOTE: Although Transonic 150 is not harmful to humans, cats, dogs or farm animals, it will be uncomfortable to pet hamsters, gerbils and ferrets. Be certain that pets in the rodent family are not near the Transonic 150 during operation.

Simply plug into any standard 110-volt electrical wall outlet. An L.E.D. light will flash whenever the unit is operating. The unit functions automatically and continuously as long as the unit is plugged in.

The unit should be positioned to take advantage of hard surfaces (walls, windows, mirrors) so that the sounds can "bounce off" or ricochet. This creates an echo effect that compounds the sounds and creates more disruption.

Operate the unit 24 hours a day for at least 30 days. Then, for best results, use the TRANSONIC 150 continuously, occasionally moving the unit to a different wall outlet location, or placing it in a different room.

#### ABOUT MICE

Mice are creatures of habit. They follow consistent routines, living in social groups or communities with others of their kind. They prefer to do their prowling and eating at night, but if hungry enough, they will venture out in daylight to find food. They seldom travel more than 45 metres (150 feet) from their nest.

Mice have adapted perfectly to living with man. Throughout history, they have been responsible for the transmission of diseases and enormous food losses. All rodents have very well developed hearing that is sensitive to both sonic and ultrasonic noises.

#### ABOUT OTHER WEITECH PRODUCTS

Weitech manufactures several other products including several

bird repellents. All Weitech products are made in the U.S.A., in our plant in Sisters, Oregon and all products are backed with a two-year unconditional guarantee of customer satisfaction.

TRANSONIC 200 utilizes two ultrasonic frequencies to repel mice. The unit is also portable and will operate from a standard 9-volt battery. Protects up to 141 square metres (1,500 square feet). REGISTRATION NO. 20304, PEST CONTROL PRODUCTS ACT (Canada): For use with and in conjunction with normal control practices. (U.L. and C.U.L. listed.)

TRANSONIC CIX is a powerful heavy duty pest repeller with five settings designed to repel mice. This unit is built to withstand years of use in homes and offices, as well as restaurants and warehouses. It can be used in areas such as attics and crawl spaces where there is no electrical outlet nearby with an optional remote speaker. REGISTRATION NO. 18496, PEST CONTROL PRODUCTS ACT (Canada): For use with and in conjunction with normal control practices. (U.L. and C.U.L. listed)

TWO-YEAR UNCONDITIONAL GUARANTEE:

Transonic 150 is made by Weitech, Inc., the largest manufacturer of electronic pest control devices in the U.S.A. Each unit is backed with a two-year unconditional guarantee of satisfaction: if you are not completely satisfied, return unit for replacement, repair refund or credit.
