DIRECTIONS FOR USE:

GROTAN* FS Microbiocide is recommended for soluble and emulsifiable type aqueous metalworking fluids, such as emulsified petroleum oils, and formulations containing alcoholic fatty acid, sulfonated red oil, or naphthalene sulfonate. These fluids are usually prepared by diluting the product concentrates 1:40 to 1:60 with water. For the maintenance of a nonfouled system, add 290 mL per 10,000 L of emulsion or 290 mL – 1.45L every 8-12 weeks. For a noticeably fouled system use initial dosage range of 580 mL – 1.45 L followed by subsequent dosages depending upon the treatment level noted above. A higher dosage range and/or increased frequency of treatment may be required depending on rate of dilution of the preservative with makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness system design, etc.

The preservative should be dispensed into the use-dilution of the metalworking fluid by a metering pump and uniformly dispersed throughout the system.

GROTAN* FS weighs 1.25kg/Litre.

FIRST AID: Do not induce vomiting. Drink promptly a large quantity of milk, egg whites, gelatin solution or if these are not available drink large quantities of water. Avoid alcohol. Call physician or Poison Control Centre immediately.

IF INHALED: Remove immediately to fresh air. If not breathing, apply artificial respiration. If breathing is difficult, give oxygen. Call a physician.

IF ON SKIN: Wash thoroughly with soap and water. Remove and wash contaminated clothing before re-use.

IF IN EYES: Wash with plenty of water for at least 15 minutes. Call a physician.

TOXICOLOGY: Probable mucosal damage may contraindicate the use of gastric lavage. Measures against circulatory shock,, respiratory depression and convulsions may be needed.
