CO-OP® BROMONE* MOUSE KILLER
CANARY SEED MOUSE BAIT

USE LIMITATIONS

Bait **MUST** either be placed in tamper-resistant bait stations or in locations not accessible to children, pets or livestock. **DO NOT** place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food.

DIRECTIONS FOR USE (indoors and against the outside walls of buildings): Punch out hole on face of box and use as bait station or place tablespoon amounts of bait wherever there are signs of mice. Co-op Bromone* Mouse Killer Canary Seed Mouse Bait should be placed in protected areas, inaccessible to humans, pets, fowl and domestic animals, behind boards next to wall, between walls and in mouse holes. Provide Co-op Bromone Mouse Killer Canary Seed Mouse Bait as long as mice feed - at least 15 days.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN, PETS AND LIVESTOCK. May be harmful or fatal if swallowed or absorbed through the skin. Do not open pre-measured place packs. Rubber gloves must be worn when handling this product and when disposing of dead rodents, unconsumed bait and empty containers. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Wash skin thoroughly with soap and water after handling. Wash contaminated clothing, separately from other laundry, with soap and hot water before reuse. **KEEP AWAY FROM FEED AND FOODSTUFFS.** Keep out of lakes, streams or ponds.

FIRST AID: If in eyes, flush with water for 15 minutes. **If on skin,** wash with soap and water. **If swallowed,** give patient one or two glasses water and **INDUCE VOMITING** by touching back of throat with a finger or blunt object. Repeat until vomit fluid is clear. Never give anything by mouth to an unconscious person. For all cases of human ingestion, immediately notify a physician or poison control centre. If pet or livestock poisoning is suspected, immediately contact a veterinarian. Take container, label or product name and P.C.P Registration Number with you when seeking medical attention.

TOXICOLOGICAL INFORMATION: This product contains an anti-coagulant chemical which, if taken accidentally by humans, domestic animals or pets, may reduce the clotting ability of the blood and haemorrhage may result. Vitamin K₁ in the form of intramuscular or subcutaneous injections, or by oral ingestion are suggested remedial treatments for anticoagulant poisoning. The severity of the case, measured by establishing prolonged prothrombin times (P.T.), will determine appropriate therapy. Monitoring P.T. will indicate the necessity of repeated treatments.

STORAGE:

Store in a cool, dry place away from other chemicals and food or feed. Store product not in use, in original container, in a secure location inaccessible to children and non-target animals.

DISPOSAL: Wrap container and discard in household garbage. Do not re-use empty container. Dispose of dead rodents in garbage or by burying.

NOTICE TO USER: This pest control product is to be used only in accordance with the directions on this label. It is an offence under the *Pest Control Products Act* to use this product in a way that is inconsistent with the directions on the label. The user assumes the risk to persons or property that arises from any such use of this product.
