MADE IN CANADA
FABRIQUE AU CANADA

C-I-L LAWN WEED DOCTOR (R) controls a broad spectrum of weeds including Dandelions, Plantain, Chickweed, Clover, Bedstraw, Buttercup, Black Medic (Yellow Clover), English Daisy, Healall, Creeping Charlie, Knotweed, Ragweed, and Shepherd's Purse.

DIRECTIONS: Measure 30 mL of product (see MEASURING DIRECTIONS) and add to 2.4 L of water in spray tank (treats 25 m²). For larger areas, mix a total of 120 mL (4 doses) to 10 L of water and spray evenly on 100 m² of lawn. Apply in late spring or early fall when weeds are actively growing and temperatures are above 10°C. Do not cut grass for several days after application. Do not water within 24 hours. Avoid applying during a long, excessively dry or hot period or when rain is expected. Do not apply to newly seeded lawns until the second or third mowing. Repeat as necessary. Fertilize the lawn to fill in bare spots after weeds are killed.

MEASURING DIRECTIONS:

Check that cap on large chamber is tight. Remove cap and liner from dose chamber. With bottle upright gently squeeze to fill 30 mL in dose chamber. Release grip on bottle to allow excess liquid to drain back into bottle.

PRECAUTIONS: KEEP OUT OF REACH OF CHILDREN. Harmful if swallowed. Causes irritation of eyes and skin. Avoid inhaling spray mist and contact with eyes, skin or clothing. Avoid spray drift onto desirable plants. Do not use on newly seeded lawns or bentgrass. Do not use clippings from a freshly sprayed lawn as a mulch. Do not use sprayer for other purposes. Do not store diluted spray. Avoid contamination of food, feed, fertilizer, seed, pesticides or any body of water. Store above 0°C.

Protective Clothing: wear long-sleeved shirt, long pants, socks, shoes and chemical-resistant (eg., rubber) gloves.

Operator Use Precautions: Rinse gloves before removal. Wash hands before eating, drink, using tobacco or using toilet. If pesticide penetrates clothing, remove immediately; then wash hands and exposed skin with soap and water, then shower. Reuse gloves for pesticide application only.

Re-entry Interval: Do not allow people (other than applicator) or

pets on treatment area during application. No do enter treated areas until spray has thoroughly dried. Maximum Application Frequency: For good turf/lawn management, normally two applications per year per treatment site are adequate. This does not include spot treatments.

DISPOSAL: Rinse container with water three times, emptying into sprayer. Dispose of empty container with household garbage.

FIRST AID: If on skin, wash with soap and water. If in eyes, flush with water and get medical aid. If swallowed, obtain medical attention or contact a Poison Control Centre. Induce vomiting by giving patient one or two glasses of water and inserting finger down the throat.

NOTICE TO BUYER:

Seller's guarantee shall be limited to the terms set out on the label and subject thereto. The buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
