Johnson's FORWARD Cleaner is a silicate-buffered, non-ionic synthetic detergent. The FORWARD formulation is an exclusive one: a unique blend of ingredients...all balanced, coordinated and working together...teamed for top efficiency and effectiveness on floors, walls, ceilings, equipment - any washable surface.

FORWARD is not caustic...is not harmful to floors or painted surfaces. IDEAL FOR FOOD EQUIPMENT WHEN RINSED WITH POTABLE (DRINKING) WATER. Suitable for use in Hospitals and Food Plants.

HOW TO USE FORWARD

For most soils...on most surfaces.

MIX a 1:40 DILUTION (25 mL of FORWARD to each litre of water). Then use as you would any good cleaner. Even with the extra strength of its full-range cleaning power, FORWARD requires no special precautions. It will not harm any washable surface.

- For extra-heavy soil, strengthen the solution (up to a 1:15 dilution).
- For light cleaning, weaker solutions (down to a 1:60 dilution) may be satisfactory.
- FORWARD works well in cold water, but the use of hot water will increase its effectiveness.
- Rinsing is not necessary except on floors that are being prepared for finishing with a wax or other floor finish.

FORWARD AS A GERMICIDE

At a 1:20 dilution (50 mL FORWARD to each litre hot or cold water), FORWARD is an effective germicide and disinfectant...contains 762 PPM of a potent quaternary germicide which is effective against a wide spectrum of microorganisms. This formulation has passed the A.O.A.C.- Use-Dilution Tests for germicides against Staphylococcus aureus (Micrococcus pyogenes or "Golden Staph") and Salmonella choleraesuis.

FORWARD AS A SANITIZING AGENT

At all recommended dilutions, FORWARD is an effective

sanitizer - cleans and significantly reduces bacterial counts. Even at a 1:60 dilution recommended for light cleaning, FORWARD is an efficient sanitizing solution. At stronger solutions, of course, including the 1:40 dilution recommended for most cleaning, it is also highly effective as a sanitizer.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.

DISPOSAL:

1. Rinse the emptied container thoroughly and add the rinsings to treatment site.
2. Follow provincial instructions for any required additional cleaning of the container prior to its disposal or reconditioning.
3. Dispose of the container in accordance with provincial requirements.
4. For information on the disposal of unused, unwanted product and the cleanup of spills, contact the Regional office of Environment Canada.
5. For small spills. Recover free liquid. Soak up residue with solids absorbent. DO NOT FLUSH INTO SURFACE STREAMS.

KEEP OUT OF REACH OF CHILDREN

SEE MSDS 124540001

PRECAUTIONS: Avoid eye contact with diluted or undiluted product. Avoid contact of undiluted product with skin.

FIRST AID: In case of contact with eyes or skin, wash thoroughly with water. If irritation persists, seek medical attention.
