WESCODYNE is an excellent germicide formulated for industrial and institutional uses.

GERMICIDAL ACTION: In use-dilution WESCODYNE kills the Herpes Simplex virus, most bacteria, molds, fungi and other pathogens which may be found on inanimate surfaces.

DIRECTIONS FOR USE

GENERAL: For general disinfecting use 90 mL of WESCODYNE to 20 litres of water. For molds, fungi, porous surfaces or those difficult to clean, use 180 mL of WESCODYNE to 20 litres of water.

WESCODYNE contains several synthetic detergents. No soaps or other cleaners should be added.

FLOORS AND WALLS: Use 60 mL of WESCODYNE to 20 litres of water for sanitizing floors and walls.

WESCODYNE is not adversely affected by common water hardness or low temperatures.

FOOD PROCESSING EQUIPMENT: Wash with a solution of 90 mL of WESCODYNE to 20 litres of water. Rinse thoroughly with potable water.

MEAT PACKING PLANTS: For the control of bacteria, molds, and fungi on walls, ceilings and refrigerators, wash with 90 mL of WESCODYNE to 20 litres of water. Rinse thoroughly with potable water. To disinfect meat processing equipment, grinding machines, knives, cutting boards, saws, meat hooks, etc. use 90 mL of WESCODYNE to 20 litres of water. Rinse thoroughly with potable water.

All of the above surfaces and equipment should be rinsed with a final sanitizing solution of 30 mL of WESCODYNE (25 ppm.) to 20 litres of water.

FIRST AID: Avoid contact with eyes. In case of accidental contact, flush eyes with plenty of water. If irritation persists, consult a physician. If accidentally swallowed, administer milk or egg whites and large quantities of water. Do not induce vomiting. Consult a physician immediately.

NOTICE TO USER: This control product is to be used only in accordance with the directions on this label. It is an offence under the Pest Control Products Act to use a control product under unsafe conditions.
