NOTICE TO USER: This control Product is to be used only in accordance with the directions on this label. It is an offense under the Pest Control Products Act to use a control product under unsafe conditions.

NATURE OF RESTRICTION: This product is to be used only in the manner authorized; contact local pesticide authorities regarding appropriate use permits that may be required.

DIRECTIONS FOR USE

HANDLING INSTRUCTIONS

1. Do not remove ALTOSID Briquets from container except for immediate use.
2. Reseal container immediately to maintain Briquet moisture content.
3. Store in a cool, moist place.

INTRODUCTION: The ALTOSID Briquet is a formulation designed to release effective levels of ALTOSID insect growth regulator over a 30 day period under typical environmental conditions. Release of ALTOSID insect growth regulator is effected by dissolution of the ALTOSID Briquet. The active ingredient, when released, tends to float up and out from the Briquet when immersed in water. Obstructions such as debris, vegetation, and loose sediment, which can cover the Briquet and inhibit normal distribution may effect control and should be considered when determining placement.

ALTOSID Briquets prevent the emergence of adult mosquitoes including *Culex*, and *Culiseta* spp., as well as those of the floodwater mosquito complex (*Aedes*, *Anopheles* and *Psorophora* spp.) from treated water. Treated larvae continue to develop normally to the pupal stage where they die.

APPLICATION TIME: Placement of ALTOSID Briquets should be made at the beginning of the mosquito season. Under normal conditions repeat treatment every 30 days. Renew at the recommended interval and rate. Continue treatment through the last brood of the season. Placement may be made at any stage of larval development. NOTE: This insect growth regulator has no effect on mosquitoes which have reached to pupal of adult stage prior to treatment.

APPLICATION SITES: ALTOSID Briquets are designed to control mosquitoes in small bodies of water which are not primary fish and wildlife habitat. Examples of application sites are: storm drains, catch basins, roadside ditches, ornamental ponds and fountains, cesspools and septic tanks, water treatment and settling ponds, flooded crypts, transformer vaults, construction and other man-made depressions, as well as other water accumulations.

APPLICATION RATES AND INTERVALS: For mosquito control in non-flow, shallow depressions (up to 60 cm. in depth), treat on the basis of surface area placing centrally 1 ALTOSID Briquets for 9.3 metre squared.

PRECAUTIONS

Do not use on food crops or on land used for growing food crops. Do not use in water which may be used for human or livestock drinking purposes. Remove all livestock during applications.

DISPOSAL

Make the empty container unsuitable for further use. Dispose of the container in accordance with provincial requirements. For information on the disposal of unused or unwanted product and the cleanup of spills, contact the regional office of Conservation and Protection, Environment Canada. FIRST AID: If on skin, wash with soap and water.

NOTICE TO BUYER

Seller's guarantee shall be limited to the terms set out on the label and subject thereto, the buyer assumes the risk to persons or property arising from the use or handling of this product and accepts the product on that condition.
